

Y2	<p>R: Addition/subtraction C: Mass: estimation/comparison E: <i>Relationship between weight and mass</i></p>	Lesson Plan 81
Activity 1	<p>Halves Look at these numbers on the BB. Think about what the arrow means. BB: 8 12 20 30 34 50 26 60 70 ↘ 6 4 15 17 10 13 25 35 30</p> <p>Who can come and join up more pairs? Ps come out to draw arrows. Class agrees/disagrees. Who can tell us the rule? (Arrow points towards the number which is 'half' of the first number) Who agrees? Who can tell us other such pairs not on the BB? (e.g. 10, 5; 100, 50)</p> <p>Extension If the arrow pointed in the opposite direction what would the rule be? (Arrow would point towards the number which is 'twice' (double) the first number.)</p> <p style="text-align: right;">5 min</p>	<p style="text-align: center;">Notes</p> <p>Whole class activity Written on BB or use enlarged copy master or OHP</p> <p>Involve several Ps Discussion, agreement, checking, praising Ask several Ps P to BB to demonstrate</p>
2	<p>PbY2b, page 81, Q.1 Read: <i>List the possible solutions and mark them on the number line.</i></p> <p>a) Let's work out the LHS first. A, come and write the answer above the addition and mark it on the number line. (49) Who agrees? Now let's do the RHS. B, come and write the answer above the subtraction and mark it on the number line. (68) Who agrees?</p> <p>Let's read out the inequality, starting from the square: 'the square is more than forty-nine and less than sixty-eight'.</p> <p>C, come and point to these two numbers and read the numbers that the square could be. Is C correct? Let's mark them on the number line and list them opposite the square.</p> <p>How many whole numbers could the square be? Let's count. (18)</p> <p>b) Done as individual work, monitored and helped. Review at BB with whole class. Mistakes corrected. How many dots did you draw on the number line? (17)</p> <p style="text-align: right;">12 min</p>	<p>Whole class activity for a) Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, reasoning, agreement, checking, praising Ps also write in <i>Pbs</i> too</p> <p>In unison BB: a) $49 < \square < 68$ \square: 50, 51, . . . , 66, 67 Class recites them in unison b) $63 < \square < 81$ \square: 64, 65, . . . , 79, 80 Praising</p>
3	<p>Comparison of mass T has various objects on table at front of class. Ps come out to hold one in each hand (e.g. book and sponge) and lower the hand which holds the heavier item.</p> <p>(e.g. P chooses the book and the sponge and lowers the hand holding the book. T: We can say that the book is <u>heavier</u> than the sponge. We could also say that the <u>mass</u> of the book is greater than the mass of the sponge, or the <u>weight</u> of the book is greater than the weight of the sponge.</p> <p>What else could we say? (The sponge is <u>lighter</u> than the book; the mass (weight) of the sponge is less than the mass (weight) of the book.)</p> <p>Repeat for other pairs of items, encouraging Ps to say which is heavier/lighter. (If P not sure, other Ps come out to confirm.)</p> <p>[NOTE: We tend to use the terms 'mass' and 'weight' as equivalent. In fact, it is mass that we measure in g or kg, whereas weight is dependent on gravity. For example:</p>	<p>Whole class activity (e.g. sponge, soap, book, packet of crisps, nail varnish, ribbon, apple, button, litre bottle of water, banana, pencil, ruler, ball, soft toy, cushion, stone, 1 kg and 1 g weights)</p> <p>Involve several Ps Praising (T should try to use the correct term, mass, at all times involving measures but not insist that Ps do so at this stage – see NOTE)</p>

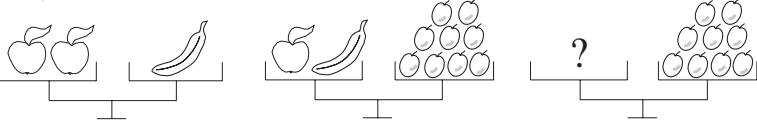

Y2		<i>Lesson Plan 81</i>
Activity	<p>on the Earth: weight (in Newtons) = $9.81 \times$ mass (in kg) on the Moon: weight (in Newtons) = $1.58 \times$ mass (in kg) This is why astronauts need to wear heavy boots on moon walks!]</p> <p style="text-align: right;">18 min</p>	Notes Discuss general idea with Ps if they ask about it.
4	<p>Standard units of measure T has 2 sets of scales (one measuring grams and the other measuring kg). Which standard units do we use to measure how heavy something is? (g, kg) Which is bigger? (kg) Which of these items would it be best to measure in g and which in kg? T holds up items and class shouts out. T demonstrates on the scales whether the chosen unit is suitable .</p> <p style="text-align: right;">23 min</p>	<p>Whole class activity Discussion, agreement BB: $1 \text{ kg} > 1 \text{ g}$ $1 \text{ g} < 1 \text{ kg}$</p>
5	<p>Interlude Action song or rhyme</p> <p style="text-align: right;">25 min</p>	Whole class in unison
6	<p>PbY2b, page 81 Q.2 Read: <i>Which weighs more? Draw arrows towards the one which is heavier.</i> <i>Write in the boxes the standard unit you would use to weigh them.</i></p> <p>Let Ps try drawing arrows first, then review at BB with whole class. (Encourage short, neat lines and done in a logical order.) Which is heaviest (lightest)? (elephant, button) Review units.</p> <p>What if the elephant was a balloon and the button was made of very heavy metal? Discuss that size is usually a good indicator of mass but it also depends on what something is made of. (e.g. show a sponge and a block of wood of similar shape/size.)</p> <p style="text-align: right;">32 min</p>	<p>Individual trial, monitored, helped Use enlarged copy master/OHP Agreement, checking praising Self-correction BB:</p>  <p>Discussion, demonstration</p>
7	<p>PbY2b, page 81 Q.3 Read: <i>Join up the equal amounts.</i> What should we do first? (Write the values above/below each addition.) Encourage Ps to draw short, neat joining lines. Review at BB with whole class. Ask some Ps to explain how they did the calculations. (e.g. $16 + 36 = 16 + 4 + 30 + 2 = 52$)</p> <p style="text-align: right;">38 min</p>	<p>Individual work. monitored Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising BB: $52 \text{ g} < 59 \text{ g} < 67 \text{ g}$</p>
8	<p>PbY2b, page 81, Q.4 T has one of each item in the picture and a set of scales on desk. Discuss which item Ps think is heaviest (lightest). Which measure is biggest (smallest)? Ps join up pictures to measures in Pbs. (monitored) Review with whole class. If there is disagreement, Ps come out to weigh the objects to check whether their answer is feasible. Discuss that, e.g. not all apples (pencils, etc.) are the same size, but they will weigh roughly the same compared to other items. Ps come out to weigh other objects in the classroom. Class can estimate mass first by comparing with objects already weighed. T (or P) writes estimated mass in table on BB. P weighs object and writes actual mass in table. Difference calculated to show how close the estimate was. (Or Ps could each have a copy of the table to fill in.)</p> <p style="text-align: right;">45 min</p>	<p>Whole class discussion Use enlarged copy master or OHP (or real items with measures on card) BB:</p>  <p>Drawn on BB or use copy master or OHP</p>

Y2	R: Calculation. Measures learned C: Mass (weight): estimation, comparison E: <i>Measurement</i>	<i>Lesson Plan</i> 82
Activity 1	Number cards Show me the number I am describing with number cards when I say: <ul style="list-style-type: none"> the next nearest whole number less than (greater than) 37 (36, 38) the next nearest whole 10 less than (greater than) 37. (30, 40) Repeat for other numbers. (Ps can choose the numbers.) <i>5 min</i>	Notes Whole class activity Cards shown in unison Incorrect responses corrected at class number line. Praising
2	PbY2b, page 82, Q.1 Read: <i>Fill in the missing numbers.</i> a) Study the puzzle carefully. What is the rule? (numbers sum to 58) Ps come out one at a time to fill in missing numbers and give a reason for choice (or write addition on BB). Class agrees disagrees. b) Think about what the rule could be this time. Let's see if you can do it without any help! Review at BB with whole class. (<i>Rule: numbers sum to 77</i>) c) What do you think we have to do in this puzzle? (Subtract the numbers on the arrows from 52 to give the missing numbers.) Ps come out one at a time to fill in missing numbers and give a reason for choice (or write subtraction on BB). Class agrees disagrees. <i>Solutions:</i> a)  b)  c)  <i>12 min</i>	Whole class activity Drawn on BB or use enlarged copy maser or OHP BB: e.g. $\square + 26 = 58$ $58 - 26 = \underline{32}$ Individual work, monitored BB: e.g. $\square + 51 = 77$ $77 - 51 = \underline{26}$ Whole class activity BB: e.g. $52 - 36 = 52 - 30 - 2 - 4 = 16$ Agreement, checking praising
3	Missing numbers T has BB ready prepared: a) $\square + 17 + 25 = 65$ b) $54 + \square + 19 = 100$ c) $63 - 15 - \square = 27$ d) $87 - 29 - \square = 33$ Deal with one part at a time. Ps come out to BB to write in answers, explaining method of solution. e.g. a) $17 + 25 = 17 + 20 + 3 + 2 = 42$; $65 - 42 = 65 - 40 - 2 = \underline{23}$ Who would do the same? Who would do it in a different way? e.g. a) $65 - 25 = 65 - 20 - 5 = 40$; $40 - 17 = 40 - 10 - 7 = \underline{23}$ Who would do it this way too? Which way is correct? (Both correct.) Let's check the answer! <i>Check:</i> $\underline{23} + 17 + 25 = 23 + 42 = 65$ Similarly for the other parts. <i>18 min</i>	Whole class activity Ps copy down in <i>Ex. Bks.</i> Discussion on 'easiest' method of solution Ps write in <i>Pbs</i> too BB: a) $\underline{23} + 17 + 25 = 65$ b) $54 + \underline{27} + 19 = 100$ c) $63 - 15 - \underline{21} = 27$ d) $87 - 29 - \underline{25} = 33$ Praising
4	Interlude Physical exercises to music <i>20 min</i>	Whole class in unison

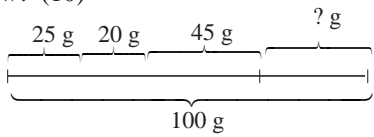

Y2		Lesson Plan 82
<p>Activity</p> <p>5</p>	<p>Comparing the mass of different materials</p> <p>T has plastic cups all the same size and set of scales at front of class. Do you think that if we filled each cup with different materials they will all weigh the same? Ask several Ps what they think.</p> <p>Demonstrate using, e.g. sand, water and flour. Ps come out to hold a cup in each hand and lower the one which is heavier. (BB).</p> <p>BB:</p>  <p>Ps compare sand against water and water against flour and write in the correct signs. Who can write in the the correct sign between sand and flour without weighing? Who agrees? How did you work it out?</p> <p>Discuss the fact that equal amounts of different materials do not necessarily have the same mass BUT equal amounts of the same material <u>do</u> have the same mass. Check on the scales.</p> <p>Extension</p> <p>I wonder how much of this 1 litre jug of water would weigh 1 kg? T puts 1 kg weight on one side of scales and pours water into the other. Class shouts out when scales are level. T shows class an empty jug. Does this mean that 1 litre of oil or 1 litre of syrup will weigh 1 kg? (No, they are different materials – only 1 litre of <u>water</u> has mass 1 kg.)</p> <p style="text-align: right;">28 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>T demonstrates at front of class with help of Ps</p> <p>Ps hold cups level at first so that the class can guess which weighs more.</p> <p>If in doubt, use scales to determine which is heavier.</p> <p>BB:</p>  <p>BB: 1 litre of water weighs 1 kg</p> <p>Discussion, agreement</p>
<p>6</p>	<p>PbY2b, page 82</p> <p>Q.2 Read: <i>Fill in the missing numbers.</i></p> <p>What do you notice about the additions? (All the units are grams and the values in each add up to 100 g.) What weighs about 100 g? (e.g. T could show a packet of ready weighed sweets, or grapes, or counters, etc. which weigh roughly 100 g)</p> <p>Deal with one part at a time. Review orally round class. If problems, demonstrate on class number line or as opposite.</p> <p style="text-align: right;">34 min</p>	<p>Individual work, monitored</p> <p>Discussion, agreement, checking, praising</p> <p>T could weigh out sweets from packet to match some of the values so that Ps have an idea of what each mass means. (Ps hold one in each hand)</p>
<p>7</p>	<p>PbY2b, page 82, Q.3</p> <p>Read: <i>A walnut has mass 10 g and a cherry has mass 8 g.</i></p> <p><i>What would be the mass of different numbers of walnuts and cherries? Complete the table.</i></p> <p>T makes sure that Ps understand what each row in the table means. If I had no walnuts, how many grams would they weigh? B, come and write it in the table. (0) Is B correct? Let's check. (BB)</p> <p>Repeat for zero cherries. (BB)</p> <p>Ps come out to choose a column and fill in the values. Class agrees/disagrees. T checks by writing equations on BB.</p> <p>Extension</p> <p>Study the table. How many walnuts and how many plums have an equal mass? (4 walnuts and 5 cherries, or 8 walnuts and 10 cherries)</p> <p style="text-align: right;">40 min</p>	<p>Whole class activity</p> <p>Drawn on BB or use enlarged copy master or OHP (T could have real walnuts and cherries to show Ps)</p> <p>BB: 0 times 10 g = 0 g 0 times 8 g = 0 g etc.</p> <p>Ps write in <i>Pbs</i> too</p> <p>4 times 10 g = 5 times 8 g = 40 g 8 times 10 g = 10 times 8 g = 80 g</p> <p>Elicit that 80 g is <u>twice</u> 40 g</p>
<p>8</p>	<p>PbY2b, page 82, Q.3</p> <p>Deal with one part at a time. Teacher (Ps) reads problem a few times. Ps are given time to work it out in <i>Pbs</i>. Ps show answers with number cards on command. P with correct answer comes out to BB to explain method of solution. Class agrees/disagrees.</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>BB: Monday <¹⁵g Thursday</p> <p>a) 53 g – 15 g = <u>38</u> g b) 53 g + 38 g = 91 g 91 g – 85 g = <u>6</u> g</p>

Y2	R: Calculations. Known measures C: Mass (weight): estimation, comparison E: <i>Finding the rule</i>	<i>Lesson Plan</i> 83
Activity		Notes
1	Secret numbers Listen very carefully, do the calculation in your head, and show me the answer with a number card when I say. <i>I thought of a number, subtracted 25 and was left with 30. What was the number I first thought of?</i> Show me with number cards . . . now! (55) A , come and explain how you got your answer. Who did it a different way? Let's check that A is correct. (BB) Repeat with another 'secret' number, but this time using an addition. _____ 5 min _____	Whole class activity T repeat slowly a few times (Mental calculation backwards) In unison BB: $30 + 25 = 55$ Check: $55 - 25 = 30$ Praising
2	Measuring mass T has various implements for measuring mass (e.g. balances, scales, bathroom scales, coil spring scale) and various items to weigh. Demonstrate measurement with non-standard units (e.g. cubes, Cuisenaire rods) and with standard units (g, kg). Ps come out in pairs. They choose 3 items and use different implements to find out which is heaviest, with help of T. Class can estimate first. _____ 10 min _____	Whole class activity, but measuring done in pairs T suggests methods of measuring Praise correct estimates
3	PbY2b, page 83 Q.1 Read: <i>Join up each picture to a suitable measure.</i> Talk about the animals first and their relative size. Are they made from the same material? (Yes – bones, muscle, skin, etc.) Which is biggest (smallest)? (rhino, chicken) Which measure is biggest (smallest)? (100 kg, 1 kg) Ps come out to join up the animals to the matching measures, explaining their choice. Class agrees/disagrees. Discussion. How many chickens (dogs) would weigh roughly the same as a rhino (pig)? (100, 5) Would they be exactly equal? (No, because the same type of animals are not always the same size, so do not weigh exactly the same.) _____ 15 min _____	Whole class activity Use enlarged copy master/OHP Discussion, agreement BR:  Discussion. Ask several Ps what they think. Compare with standard units (g or kg) which always have the same mass.
4	PbY2b, page 83 Q.2 Read: <i>Join up the equal quantities.</i> T explains task. (Work out the value for each label. If it equals one of the measures in the middle column, join it up.) T encourages working in logical order, e.g. from top to bottom on LHS, then top to bottom on RHS. Review at BB with whole class. Mistakes corrected. If problems, write calculations on BB. _____ 20 min _____	Individual work, monitored Use enlarged copy master/OHP BB:  Reasoning, agreement, self-correction
5	Interlude Song, rhyme _____ 22 min _____	Whole class in unison

Y2		Lesson Plan 83
Activity 6	<p>PbY2b, page 83</p> <p>Q.3 Read: <i>List the amounts which make the inequality true.</i></p> <p>a) Let's work out the LHS first. B, come and write the answer above the subtraction. (70 kg) Is B correct?</p> <p>Now let's do the RHS. C, come and write the answer above the subtraction. (80 kg) Is C correct?</p> <p>Let's read out the inequality, starting from the star: 'the star is more than 70 kg and less than 80 kg'.</p> <p>What values could the star be? Let's say them together. '71 kg, 72 kg, 73 kg, 74 kg., 75 kg, 76 kg, 77 kg, 78 kg, 79 kg'</p> <p>b) Let's see if you can do this part on you own!</p> <p>Review at BB with whole class. Mistakes corrected.</p> <p>T asks several Ps to read out the inequality using a value from their list. Insist on them saying the units too!</p> <p style="text-align: right;">29 min</p>	<p style="text-align: center;">Notes</p> <p>Whole class activity for a)</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, reasoning, agreement, checking, praising</p> <p>Ps also write in <i>Pbs</i> too</p> <p>BB:</p> <p>a) $70 \text{ kg} < \star < 80 \text{ kg}$ $\star: 71 \text{ kg}, 72 \text{ kg}, \dots, 79 \text{ kg}$</p> <p>Individual work, monitored</p> <p>b) $65 \text{ kg} > \frown > 59 \text{ kg}$ $\frown: 64 \text{ kg}, 63 \text{ kg}, \dots, 58 \text{ kg}$</p> <p>Praising</p>
7	<p>PbY2b, page 83</p> <p>Q.4 a) Read: <i>Complete the table.</i></p> <p>What do you think the rule is? (Quantities in each column must add up to 100 kg.) What do you think weighs about 100 kg? (e.g. rhino) T should check other suggestions!</p> <p>D, what is the missing quantity in the first column? (30 kg) Why do you think that? (Because $70 \text{ kg} + 30 \text{ kg} = 100 \text{ kg}$)</p> <p>Let's see who can finish first with them all correct!</p> <p>Review orally round class. If problems, Ps come out to write addition on BB. Mistakes corrected.</p> <p>b) Read: <i>Write another addition for 100 kg.</i></p> <p>Review orally round class (e.g. $100 \text{ kg} + 0 \text{ kg}$, $50 \text{ kg} + 50 \text{ kg}$) Ps point out incorrect or duplicated answers.</p> <p style="text-align: right;">34 min</p>	<p>Individual work, monitored, helped</p> <p>Discussion. T could have a list already prepared.</p> <p>Reasoning, agreement</p> <p>Set a time limit</p> <p>Agreement, self-correction</p> <p>At a good pace</p> <p>Reasoning, agreement.</p> <p>Praising</p>
8	<p>Ordering measures of mass</p> <p>T has BB already prepared. Let's put these measures in increasing order but let's read them first.</p> <p>BB: 20 g, 1 kg, 18 kg, 50 g, 3 kg, 84 g, 37 g, 54 kg, 5 g</p> <p>Ps come out one at a time to write the list on BB, scoring out each mass as it is used. Class points out mistakes. Ps copy final list into <i>Ex. Bks.</i> Let's read the ordered list from left to right (right to left).</p> <p>BB: 5 g, 20 g, 37 g, 50 g, 1 kg, 3 kg, 18 kg, 54 kg</p> <p style="text-align: right;">39 min</p>	<p>Whole class activity</p> <p>In unison</p> <p>At a good pace</p> <p>In unison, at speed</p>
9	<p>Problem</p> <p>Listen carefully, picture the story in your head and show me the answer with number cards when I say. Draw a diagram to help you.</p> <p><i>Jane bought a 100 g packet of crisps. She ate 75 g. How many grams of crisps were left? Show me with number cards . . . now! (25)</i></p> <p>X, come and explain your answer. Who agrees/disagrees?</p> <p><i>Answer:</i> 25 g of crisps were left.</p> <div style="text-align: center;"> </div> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>T (and Ps) repeat a few times</p> <p>Give Ps time to think</p> <p>In unison</p> <p>Reasoning, agreement, checking, praising</p> <p>BB: $100 \text{ g} - 75 \text{ g} = \underline{25} \text{ g}$</p>

Y2	R: Calculations: mass C: Mass: estimation, comparison E: <i>Inequalities</i>	Lesson Plan 84
Activity 1	Logic problem T has BB already prepared. How many apples will balance the plums? BB:  <p>How can the pictures help us to work it out? Ps explain their reasoning and class agrees/disagrees. T helps Ps to write equations about each balance. Praise if a P deduces that 1 apple = 3 plums. T shows Ps how the equations can be written in a shorter way, using only initial letters. (Preparation for algebra)</p> <p style="text-align: right;">8 min</p>	Notes Whole class activity Use enlarged copy master/OHP Discussion, reasoning, agreement, checking BB: 2 apples = 1 banana 1 apple + 1 banana = 9 plums 1 apple + 2 apples = 9 plums 3 apples = 9 plums so 1 apple = 3 plums or $2a = 1b$, $1a + 1b = 9p$ $1a + 2a = 9p$ $3a = 9p$ $1a = 3p$
2 Extension	PbY2b, page 84, Q.1 Let's measure how heavy everyone in the class is and keep a tally in this table. (T reminds Ps what a tally is.) Why do you think we are using kg and not grams as the standard unit? (grams is too small) All the Ps in the class come out one at a time to be weighed (or Ps could be asked at end of previous day to weigh themselves at home). T rounds to nearest kg and notes the value for each P (see Activity 5 below). P puts tally mark in correct row in table. Ps first count up the tally marks and write totals at the end of the rows. T checks that everyone has the correct totals before asking individual Ps to read out the questions. Deal with one question at a time. Ps write weight group in <i>Pbs</i> . Discussion/agreement on correct answer. Make a bar chart of the results on the BB, after demonstrating with lines of Ps at front of class. (All Ps in same weight group form a line.) Ps come out to draw/colour bars. What does the longest (shortest) bar show? Ps can draw own bar chars on squared paper (or use 2 cm grid from Y1)	Whole class activity Table drawn on BB or use enlarged copy master/OHP Ps write own mass at top of <i>Pb</i> page as a reminder Ps also keep a tally in <i>Pbs</i> . Discussion, reasoning, agreement, praising Whole class activity first Demonstration, discussion On BB or use copy master Individual work, helped.
3	Interlude Mental counting. Ps put heads on hands on desks and count in heads from 0 to 100 and back down to zero again.	Whole class counting
4	PbY2b, page 84 Q.2 Read: <i>Colour the equal amounts in the same colour.</i> What should we do first? (Write the value beside each shape.) Review at BB with the whole class. Mistakes corrected. If problems, P comes out to write equation on BB and show on class number line. e.g. $37 \text{ kg} + 48 \text{ kg} = 37 \text{ kg} + 40 \text{ kg} + 3 \text{ kg} + 5 \text{ kg} = 85 \text{ kg}$	Individual work. monitored Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising BB: $45 \text{ kg} < 65 \text{ kg} < 85 \text{ kg}$
5	Mental calculation using kg T tells Ps to take note of their own mass (weight) as they must be ready to stand up quickly when required. T describes a value according to the results in Activity 2 and Ps stand up if their mass fits that value. e.g. 'more than 30 kg and less than 38 kg', 'twice 15 kg'; '19 kg + 34 kg', 'more than 47 kg – 18 kg and less than 60 kg', '15 kg less than 50 kg'	Whole class activity T should have taken note of Ps' weights in Activity 2 T does random check on Ps standing. Class agrees/disagrees Done at a good pace. Praising

32 min

<p>Y2</p>		<p><i>Lesson Plan 84</i></p>
<p>Activity</p> <p>6</p>	<p>PbY2b, page 84, Q.3</p> <p>T should have a real football and cricket ball to show to class.</p> <p>Read: <i>A football weighs 3 kg. A cricket ball weighs 5 kg.</i> <i>Compare how heavy the balls are. Write in the missing signs.</i></p> <p>Ps come out to hold a ball in each hand to feel the difference in mass between one of each type. They raise the one which is lighter (football). Why is the football bigger in size but weighs less? (Football is made from a lighter material and is full of air.)</p> <p>a) to c) Deal with one part at a time. Ps come out to write in the missing signs. Class agrees/disagrees. Let's check. Ps come out to write the total value beneath the footballs and cricket balls. Ps write in <i>Pbs</i> too.</p> <p>d) This drawing has not been finished. See if you are clever enough to write in a sign and finish the drawing so that the sign is true. Review with whole class. (There will be many answers apart from the one given – try to deal with them all.) Ps come to BB to show solution and explain reasoning. Class decides whether solution is valid.</p> <p style="text-align: right;">39 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>Use enlarged copy master/OHP or cut-out balls stuck to BB</p> <p>Demonstration, discussion</p> <p>BB: a) The mass of  \leq the mass of  9 kg 10 kg</p> <p>b) The mass of  $=$ the mass of  15 kg 15 kg</p> <p>c) The mass of  $>$ the mass of  21 kg 20 kg</p> <p>e.g. d) The mass of  $>$ the mass of  6 kg 5 kg</p> <p>Praise creativity</p>
<p>7</p>	<p>Problem</p> <p>Listen carefully, picture the story in your head and show me the answer with number cards when I say. Draw a diagram to help you.</p> <p><i>Kate is making up a parcel to send to her cousin. She has already put in 25 g of biscuits, 20 g of sherbet, and 45 g of crisps. She cannot afford the postage for more than 100 g. How many g has she spare?</i></p> <p>Write the data down in your <i>Ex. Bks.</i> Draw a diagram to help you. Show me with number cards . . . now! (10)</p> <p>X, come and explain your answer. </p> <p>Who agrees/disagrees?</p> <p><i>Answer:</i> Kate has 10 g spare.</p> <p>(Discuss what it might be needed for, e.g. packing, a letter or card to say who the parcel is from, a stamp, etc.)</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>T repeats slowly a few times</p> <p>One or two Ps repeat in own words. Give Ps time to take note of data, draw, think</p> <p>In unison</p> <p>Reasoning, agreement, checking, praising</p> <p>BB: $25\text{ g} + 20\text{ g} + 45\text{ g} = 90\text{ g}$ $100\text{ g} - 90\text{ g} = 10\text{ g}$</p> <p>Talk about posting, stamps, letters, Ps' own experiences</p>

Y2		<i>Lesson Plan</i> 85
<i>Activity</i>	Calculation and measuring practice (length, capacity, mass). Finishing off bar charts. <i>PbY2b, page 85</i>	<i>Notes</i>

<h1>Y2</h1>	R: Addition, subtraction, measures C: Revision and practice E: <i>Problems in context</i>	<h2 style="text-align: center;">Lesson Plan 86</h2>
Activity 1	Logic Puzzle (OHT 16, Txt 2, page 48, Q.3) Look at this puzzle. The four 1-digit numbers along a line sum to 25. The same colour means the same number, Where should we start? (On the line which has '1' already given and 3 green circles.) BB: $1 + \textcircled{G} + \textcircled{G} + \textcircled{G} = 25$, so $\textcircled{G} = 8$. A , come and write 8 in all the green circles. Where should we go next? (Line which has 2 already given and two 8's) BB: $2 + \textcircled{Y} + 8 + 8 = 25$, so $\textcircled{Y} = 25 - 18 = 7$ B , come and write 7 in all the yellow circles. Continue in this way until puzzle is completed. (If some Ps would like to try it on their own, give them a coloured copy of the puzzle.) <div style="text-align: right;"><i>8 min</i></div>	<h3 style="text-align: center;">Notes</h3> Whole class activity Involve several Ps <i>Solution:</i> Green → 8 Yellow → 7 Violet → 4 Blue → 9 Pink → 3 Lime → 6 Turquoise → 5 If no OHP, use copy master, enlarged and coloured appropriately
2	Describing numbers T has the numbers 63, 45, 36, 72, 54 on cards on desk. Ps come out to choose the number described and stick on BB: <ul style="list-style-type: none"> • The next number smaller than 64. (63) • The sum of 20 and 25. (45) • 6 less than 42. (36) • The next number greater than 71. (72) • The difference between 100 and 46. (54) C , come and put them in decreasing order. Who agrees? What is the rule? (Decreasing by 9) Let's continue the sequence. <div style="text-align: right;"><i>13 min</i></div>	Whole class activity Involve several Ps At a good pace Class agrees/disagrees Use number line if problems BB: 72, 63, 54, 45, 36, ... '27, 18, 9, 0, (-9, -18, ...)'
3	PbY2b, page 86 Q.1 Read: <i>Fill in the missing signs.</i> (<, >, =) What are the units measuring? (length: metres and centimetres) How many centimetres are in 1 metre? (100) (BB) Tell Ps to work out any addition or subtraction first and write the result above before writing in the sign. (e.g. $3\text{ m} - 1\text{ m } 10\text{ cm} = 3\text{ m} - 1\text{ m} - 10\text{ cm}$ $= 2\text{ m} - 10\text{ cm}$ $= 1\text{ m} + 100\text{ cm} - 10\text{ cm}$ $= 1\text{ m} + 90\text{ cm} = 1\text{ m } 90\text{ cm}$) Deal with one part at a time. Review at BB with whole class. Ps come to BB to explain their answers and show calculations. Did we really need to do all the calculations? (No, not necessary in last two in b), as sign is already obvious.) <div style="text-align: right;"><i>19 min</i></div>	Individual work, monitored, helped BB: $1\text{ m} = 100\text{ cm}$ Discussion, agreement, checking, praising BB: a) $4\text{ m } 80\text{ cm} > 2\text{ m } 60\text{ cm}$ $1\text{ m } 90\text{ cm} = 3\text{ m} - 1\text{ m } 10\text{ cm}$ $64\text{ cm} - 30\text{ cm} = 69\text{ cm} - 35\text{ cm}$ b) $73\text{ cm} + 27\text{ cm} = 1\text{ m}$ $3\text{ m} - 80\text{ cm} < 5\text{ m}$ $1\text{ m} + 6\text{ cm} > 1\text{ m} - 4\text{ cm}$
4	Interlude Song or rhyme <div style="text-align: right;"><i>21 min</i></div>	Whole class in unison
5	PbY2b, page 86 Q.2 Read: <i>Fill in the missing signs.</i> (+ or -) Talk about each one first. What is it measuring? Is the answer more or less than the first quantity? Review orally round class. Mistakes corrected at class number line. <div style="text-align: right;"><i>26 min</i></div>	Individual work, monitored Discussion, agreement, self-correction Ask Ps which they found most difficult and why.

Y2		<i>Lesson Plan 86</i>
Activity 6	<p>Pby2b, page 86, Q.3</p> <p>Let's have a competition! T divides class into 4 or 5 groups (of roughly equal ability). I will give you 5 minutes to solve the 3 problems in Q.3 in your <i>Pbs</i>. You can do the problems in any order and use what you like to help you. Ps finished first may help the others in your group.</p> <p>Listen carefully while I will read out each question twice, then start when I tell you. When you are finished, sit up with your arms folded. The group which is fastest and has most correct answers will win a prize!</p> <p>a) Read: <i>Ann cut 8 cm from a 12 cm piece of ribbon. What length of ribbon remained?</i> (4 cm)</p> <p>b) Read: <i>Little Red Riding Hood gathered 17 mushrooms altogether. She found 8 mushrooms in a field and the rest in the wood. How many mushrooms did she find in the wood?</i> (9)</p> <p>c) Read: <i>Alec had £20. He spent £12 and then was given £8 by his Aunt. How much money does Alec have now?</i> (£16)</p> <p>Start . . . now! T notes when Ps finish. After 5 minutes T says 'Stop!' T elicits answers and Ps mark own work. Who had all correct (2 correct, 1 correct)? T notes total score for each group on BB. Review mistakes. Ps with correct answers show solutions on BB. T selects winning group.</p> <p style="text-align: right;">36 min</p>	<p style="text-align: center;">Notes</p> <p>Individual work done as a whole-class competition</p> <p>Only monitored, not helped</p> <p>Preliminary discussion</p> <p>T repeats each slowly, emphasising relevant data</p> <p>Solutions:</p> <p>a) $12\text{ cm} - 8\text{ cm} = \underline{4\text{ cm}}$ 4 cm of ribbon remained</p> <p>b) $17 - 8 = 9$ She found 9 mushrooms in the wood.</p> <p>c) $£20 - £12 + £8 = \underline{£16}$ Alec has £16 now.</p> <p>Praising. Awards given (e.g. stars/stickers)</p>
7	<p>PbY2b, page 86, Q.4</p> <p>Read: <i>List the numbers which make the inequalities true.</i></p> <p>a) Let's read the inequality together, starting at the rectangle: 'the rectangle is more than seventy minus forty-nine and less than fifty minus twenty-five'.</p> <p>What should we do first? (Work out the subtractions on either side.)</p> <p>X, come and write the answer above the subtraction on the LHS and point to it on the number line. (21) Is X correct?</p> <p>Y, come and write the answer above the subtraction on the RHS and point to it on the number line. (25) Is Y correct?</p> <p>Let's all read out the <u>whole</u> numbers between 21 and 25 that the rectangle could be: '22, 23, 24'. T writes them on BB, Ps in <i>Pbs</i>.</p> <p>b) Let's read the inequality together from left to right: 'forty-nine is less than forty-three plus the circle; forty-three plus the circle is less than sixty-one minus eight'.</p> <p>What should we do first? (Work out the subtraction on RHS side.)</p> <p>Z, come and write the answer above the subtraction on the RHS and point to it on the number line. (53) Is Z correct?</p> <p>Let's all read out the <u>whole</u> numbers between 49 and 53: '50, 51, 52'.</p> <p>Are these the numbers the circle could be? (No, these are the numbers that 43 plus the circle could be.) Write the whole numbers that the circle could be in your <i>Pbs</i>. (7, 8, 9)</p> <p style="text-align: right;">42 min</p>	<p>Whole class activity</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>In unison</p> <p>Reasoning, agreement</p> <p>Ps also write in <i>Pbs</i> too</p> <p>BB:</p> <p>a) $21 < \square < 25$ \square: 22, 23, 24</p> <p>In unison</p> <p>Reasoning, agreement</p> <p>Ps also write in <i>Pbs</i></p> <p>BB:</p> <p>b) $49 < 43 + \bigcirc < 53$ $43 + \bigcirc$: 50, 51, 52 \bigcirc: 7, 8, 9</p> <p>T starts to use 'whole' numbers in preparation for fractions</p>
8	<p>Problem</p> <p><i>How much ribbon did I buy if I cut off 20 cm and 1 m 50 cm was left?</i></p> <p>T asks several Ps what they think. P with correct response explains solution to class. Another P checks with a subtraction.</p> <p><i>Answer:</i> I bought 1 m 70 cm of ribbon. <i>Check</i></p> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>Ps suggest 'plan' for solution</p> <p>Reasoning, agreement, checking</p> <p>$1\text{ m }50\text{ cm} + 20\text{ cm} = \underline{1\text{ m }70\text{ cm}}$</p> <p>$1\text{ m }70\text{ cm} - 20\text{ cm} = 1\text{ m }50\text{ cm}$</p>

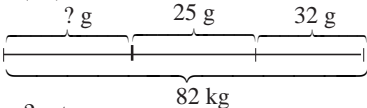

Y2	R: Addition, subtraction, measures C: Revision and practice E: <i>Paying money, receiving change</i>	<i>Lesson Plan</i> 87
Activity 1	Measures T describes a quantity. P replies saying number and units, e.g. <ul style="list-style-type: none"> • 3 days more than 1 week (10 days) • 41 g less than 100 g (59 g) • If I added 100 cl to it, there would be 5 litres. (4 litres) • 27 cm less than 1 m. (73 cm) etc. <p style="text-align: right;">5 min</p>	Notes Whole class activity At speed round class Class points out incorrect answers Ps can ask questions too! Praising
2	PbY2b, page 87 Q.1 Read: <i>Fill in the missing quantities. The middle quantity is the sum of the 3 along each side.</i> What do you notice about the puzzles? (Both in shape of triangles; ellipses are missing quantities, 3 along each side of triangles; a) : measures of length; b) : measures of mass) Deal with one part at a time. Review at BB with whole class. Mistakes corrected. <i>Solutions:</i> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> <p>a)</p> </div> <div style="text-align: center;"> <p>b)</p> </div> </div> <p style="text-align: right;">11 min</p>	Individual work, monitored, helped Discussion. Ask several Ps T gives hints if necessary Drawn on BB or use enlarged copy master or OHP Reasoning, agreement, checking, praising BB: e.g. a) $32\text{ cm} + 27\text{ cm} + 41\text{ cm} = 100\text{ cm} = 1\text{ m}$ b) $32\text{ kg} + 21\text{ kg} + 47\text{ kg} = 100\text{ kg}$
3	PbY2b, page 87 Q.2 Read: <i>Find a rule, then complete the table. Write the rule in different ways.</i> Look carefully at the two completed columns. Which row has the biggest values? (square) What could the rule be? (Ps agree on one form of rule, even if it has been expressed only in words, e.g. the ring (circles) + the triangle = the square) Let's use this rule to complete the table. Review at BB with whole class. Mistakes corrected. A , come and write the rule in a mathematical way. Who agrees? Who can write it in a different way? etc. Let's check. Who can think of other values not shown in the table? <p style="text-align: right;">18 min</p>	Individual work, monitored, helped Drawn on BB or use enlarged copy master or OHP Discussion, reasoning, agreement, checking with values from table BB: $\square = \odot + \triangle$ $\odot = \square - \triangle$ $\triangle = \square - \odot$
4	Interlude Song or rhyme <p style="text-align: right;">20 min</p>	Whole class in unison
5	PbY2b, page 87, Q.3 a) Study the picture carefully. It shows an easy way of calculating $24 + 19$. Who can tell us how the picture relates to the numbers? (On LHS: 2 packets of 10 sweets plus 4 extra sweets = 24 sweets On RHS: 2 packets of 10 sweets = 20 sweets) Instead of adding 19 to 24, which is difficult, we have added 20 to 24 and then taken away 1. Will this give the same answer? (Yes, because $+ 19$ is the same as $+ 20 - 1$), or $(23 + 20)$ is the same	Whole class activity Drawn on BB or use enlarged copy master or OHP (or demonstrate with real packets of 10 sweets) Involve several Ps in the discussion – show different ways of reasoning (BB)

Y2		<i>Lesson Plan 87</i>
Activity	<p>as $24 + 19$ – we have added the number 1 more to the number 1 less) B, come and write in the missing number. (43) Who agrees?</p> <p>b) Study the picture carefully. Who can explain to us what it shows? (It shows an easy way of calculating $13 + 18$.) (On LHS: 1 packets of 10 sweets plus 3 extra sweets = 13 sweets On RHS: 2 packets of 10 sweets = 20 sweets) Instead of adding 18 to 13, which is difficult, we have added 20 to 13 and then taken 2 away. Will this give the same answer? (Yes, because $+ 18$ is the same as $+ 20 - 2$) or ($13 + 18$ is the same as $11 + 20$ – we have added the number 2 more to the number 2 less) C, come and write in the missing number. (31) Who agrees? Who thinks this is an easier method of calculating? Who disagrees? Let's see who is quickest to do these additions in your head. T: e.g. $25 + 19$, $14 + 19$, $56 + 18$, $17 + 18$ T asks quickest Ps for the answer and their method of calculation. Stress that it does not matter which method is used, as long as it results in the correct answer! Ps should use the 'easiest' method for them.</p> <p style="text-align: right;">28 min</p>	<p style="text-align: center;">Notes</p> <p>Reasoning, agreement, checking, praising BB: a) $24 + 19 = 24 + 10 + 6 + 3 = 43$, or $24 + 19 = 24 + 20 - 1 = 44 - 1 = 43$, or $24 + 19 = 24 + 20 - 1 = 24 - 1 + 20 = 23 + 20 = 43$ b) $13 + 18 = 13 + 10 + 7 + 1 = 31$, or $13 + 18 = 13 + 20 - 2 = 33 - 2 = 31$, or $13 + 18 = 13 + 20 - 2 = 13 - 2 + 20 = 11 + 20 = 31$</p>
6 Extension	<p>PbY2b, page 87 Q.4 Read: <i>Bunny has coloured some of the eggs. How many eggs have not been coloured? Write an equation for each part.</i></p> <p>Deal with one part at a time. Use part a) as an example: How many eggs are in a full box? (10) How many full boxes? (5) How many extra eggs? (4) How many eggs are there altogether? (54) How many of them have been coloured? (9) So the number of eggs not coloured is: $54 - 9 = 45$ Parts b) to d) done as individual work. Review at BB with whole class. Mistakes corrected.</p> <p>Discuss different methods of calculation. Relate to Q.3 in <i>Pb</i>. e.g. $54 - 9 = 54 - 4 - 5 = 54 - 10 + 1 = 55 - 10 = 45$ $44 - 19 = 44 - 10 - 4 - 5 = 44 - 20 + 1 = 45 - 20 = 25$</p> <p style="text-align: right;">36 min</p>	<p>Whole class activity for a) Drawn on BB or use enlarged copy master or OHP Involve several Ps Discussion, agreement, checking, praising</p> <p>Individual work, monitored, helped BB: a) $54 - 9 = 45$ b) $44 - 19 = 25$ c) $54 - 29 = 25$ d) $44 - 29 = 15$</p>
7	<p>Shopping T has items on desk with prices attached, e.g. book at 38 p, teddy bear at 49 p, etc. and a purse lying in front of each (purse in front of book contains five 10 p coins and three 1 p coins; purse in front of teddy contains six 10 p coins and five 1 p coins, etc.) X, come and choose which one you would like to buy (e.g. book). This is your purse. Tell the class what you have in your purse. (53 p) (T sticks cardboard coins on BB to show class.) How will you pay for the book? X hands T four 10 p coins and T gives X two 1 p coins in change. X how much do you have in your purse now? (15 p) Let's write it as an equation. X had 53 p in his purse. X paid for the 38 p book with four 10 p coins (40 p) and received two 1 p coins (2 p) back in change. X now has one 10 p and five 1 p coins (15 p) left in his purse. (T manipulates coins on BB.) Ps write equations in <i>Ex. Bks</i>. Repeat with other Ps, items, prices and purses.</p> <p style="text-align: right;">45 min</p>	<p>(Or <i>Tx 2, page 73, Q.3 and 4</i> if T thinks Ps cannot cope.) Items, price tags and purses should be prepared beforehand BB: e.g. <i>Book:</i> $53 \text{ p} - 38 \text{ p} = 15 \text{ p}$ $\quad \quad \quad - 40 \text{ p} + 2 \text{ p}$ <i>Teddy:</i> $65 \text{ p} - 49 \text{ p} = 16 \text{ p}$ $\quad \quad \quad - 50 \text{ p} + 1 \text{ p}$ etc. Demonstration/discussion – aim is to promote understanding only!</p>

Y2	<p>R: Mental calculation. Measures</p> <p>C: Revision and practice</p> <p>E: <i>Combinatoric problems</i></p>	<p style="text-align: center;"><i>Lesson Plan</i></p> <p style="text-align: center; font-size: 2em;">88</p>																				
Activity	<i>Notes</i>																					
<p style="text-align: center;">1</p>	<p>Making additions</p> <p>T has written on BB: 58, 74, 85 + 5, 7, 9</p> <p>Let's see how many additions we can make by adding one of the numbers on the LHS to one of the numbers on the RHS. Let's do it logically! T starts by saying and writing on BB: '58 + 5, 58 + 7, ...'</p> <p>Ps continue saying additions (without the results) round the class and T writes in order on BB. (9 additions)</p> <p>Could we have worked out that there were 9 additions without writing them all down? (Yes, 3 additions for each of the 3 numbers on the LHS, i.e. 3 lots of 3, or 3 times 3 = 9)</p> <p style="text-align: right;"><i>5 min</i></p>	<p>Whole class activity</p> <p>Agreement, checking, praising</p> <p>At a good pace</p> <p>BB:</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="padding: 2px;">58 + 5</td> <td style="padding: 2px;">74 + 5</td> <td style="padding: 2px;">85 + 5</td> </tr> <tr> <td style="padding: 2px;">58 + 7</td> <td style="padding: 2px;">74 + 7</td> <td style="padding: 2px;">85 + 7</td> </tr> <tr> <td style="padding: 2px;">58 + 9</td> <td style="padding: 2px;">74 + 9</td> <td style="padding: 2px;">85 + 9</td> </tr> </table> <p>Discussion about possible number of cases. <p style="text-align: center;">3</p>	<p>PbY2b, page 88</p> <p>Q.1 Read: <i>Complete the table.</i></p> <p>T explains that the first row in the table is the <u>heading</u> and it shows what should be put in the 5 rows below. The first column in the table shows the numbers the triangle could be.</p> <p>Let's do the first row together. If the triangle equals 44, what should go in the 'triangle + 6' space? (Ps shout out '50' and T writes 50 in the table.) Continue until first row is complete.</p> <p>Let's see if you can complete the rest of the table on your own.</p> <p>Review at BB with the whole class. Mistakes corrected at class number line if necessary.</p> <p style="text-align: right;"><i>18 min</i></p>	<p>Individual work, monitored, helped</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>In unison. Ps write in <i>Pbs</i> too</p> <p>Ps complete rest of table</p> <p>Reasoning, agreement, checking, self-correcting</p> <p>Praising</p>																				
<p style="text-align: center;">4</p>	<p>Interlude</p> <p>Song, rhyme, exercises</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Whole class in unison</p>																				
<p style="text-align: center;">5</p>	<p>PbY2b, page 88, Q.2</p> <p>Read: <i>Join up the equal quantities.</i></p> <p>What can you say about the measures? (In each part, 10 measures altogether, 5 on LHS and 5 on RHS; measures in part a) are lengths; measures in part b) are weights/masses.)</p> <p>Ps come out one after the other to choose a measure on the LHS and join it up to an equal measure on the RHS, explaining their reasoning. Class agrees/disagrees.</p> <p>Insist on Ps using correct units and saying the equation, e.g. '50 cm is equal to half a metre'. Ps write any calculations on the BB.</p> <p>e.g. 50 cm – 16 cm = 50 cm – 10 cm – 6 cm = 34 cm</p> <p>(Some measures may be outside the Ps' experience but can be deduced from the matching measure on the other side.)</p> <p style="text-align: right;"><i>26 min</i></p>	<p>Whole class activity</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Discussion</p> <p>Done at a good pace</p> <p>Ps draw joining lines in <i>Pbs</i> too</p> <p>Reasoning, agreement, checking praising</p> <p>Extra praise if Ps do this without help!</p>																				

Y2		<i>Lesson Plan 88</i>
Activity		Notes
<p>6</p>	<p>PbY2b, page 88, Q.3</p> <p>Let's see how many of these you can do correctly in 5 minutes! Sit up with your arms folded when you have finished. Start . . . now! Stop!</p> <p>Review orally round the whole class. Mistakes corrected.</p> <p>How many had 15 correct (14, 13, more than 10)? Who did not have time to do them all? T awards 'prize' to winner (fastest and highest score).</p> <p>We will have another competition later! See if you can beat your score then!</p> <p style="text-align: right;"><i>33 min</i></p>	<p>Individual work, monitored Keep to time limit Ps mark own (or neighbour's) work and count number correct out of 15. Self-correction, evaluation Praising only</p> <p>Encourage Ps to try harder next time.</p>
<p>7</p>	<p>Logic Puzzle (OHT 18, Txt 2, page 77, Q.1, RHS)</p> <p>Look at this puzzle. The four numbers along each line add up to <u>75</u>. (T writes 75 above or below puzzle.)</p> <p>The same colour means the same number. There is another limitation on the number in each rectangle. What does this tell us? (T points to the inequality.) (The numbers in each rectangle must be more than or equal to 16 and less than or equal to 22.)</p> <p>Let's say all the numbers the rectangles could be. '16, 17, 18, 19, 20, 21, 22' (T writes them on the BB.) We have to work out which of these numbers each colour represents.</p> <p>Where should we start? (On the bottom line, which has 3 '19's already given.) BB: $19 + 19 + \square + 19 = 75$.</p> <p>A, come and write in the missing number. (18) Who agrees? Let's check. ($75 - 19 - 19 - 19 = 18$) A, write 18 in all the <i>violet</i> rectangles.</p> <p>Where should we go next? (3rd row of inner rectangles) BB: $18 + \square + 18 + 18 = 75$</p> <p>B, come and write in the missing number. (21) Who agrees? Let's check. ($75 - 18 - 18 - 18 = 21$) B, write 21 in all the <i>blue</i> rectangles.</p> <p>Continue in this way until puzzle is completed (e.g. then 2nd row of inner rectangle to get <i>light green</i>, then vertical row on RHS to get <i>yellow</i>, then slanting row on RHS to get <i>orange</i>, then top row of inner rectangle to get <i>dark green</i>)</p> <p>(If some Ps would like to try it on their own, give them a coloured copy of the puzzle.)</p> <p style="text-align: right;"><i>40 min</i></p>	<p>Whole class activity If no OHP, use copy master, enlarged and coloured appropriately</p> <p>BB: $16 \leq \square \leq 22$ \square: 16, 17, 18, <u>19</u>, 20, 21, 22</p> <p>In unison</p> <p><i>Solution:</i></p> <p style="padding-left: 40px;">Violet → 18 Blue → 21 Light Green → 17 Yellow → 22 Orange → 16 Dark Green → 20</p> <p>Involve as many Ps as possible Other orders possible – Ps suggest where to go next. Checking, agreement, praising</p> <p>N.B. If too difficult for class, do alternative below instead</p>
<p>8</p>	<p>PbY2b, page 88, Q.4</p> <p>Let's see how many of these you can do correctly in 4 minutes! Try to beat your score last time. Sit up with your arms folded when you have finished. Start . . . now! Stop!</p> <p>Review orally round the whole class. Mistakes corrected.</p> <p>Stand up if you have a higher score this time. How many more correct? (T asks each P in turn.) T awards 'prize' to most improved P.</p> <p style="text-align: right;"><i>45 min</i></p>	<p>Individual work, monitored Keep to time limit Ps mark own (or neighbour's) work and count number correct out of 15. Self-correction Praising only</p>
<p>Alternative Activity 7</p>	<p><i>72 pupils from Y2 classes are about to leave school on a trip. 57 of them have already arrived. How many pupils are the buses waiting for?</i></p> <p>Show me with number cards . . . now! (15) Diagram/plan on BB.</p> <p><i>Answer:</i> The buses are waiting for <u>15</u> pupils.</p>	<p>T reads a few times. Ps repeat in own words. Cards shown in unison. Discussion, agreement, checking, praising</p> <p>BB: $72 - 57 = 15$</p>

Y2	R: Calculation C: Revision, practice E: Equations	<i>Lesson Plan</i> 89									
Activity		Notes									
1	<p>Making subtractions</p> <p>T has written on BB: 53, 65, 82 – 4, 6, 12</p> <p>Let's see how many subtractions we can make by taking away one of the numbers on the RHS from one of the numbers on the LHS. Let's do it logically! What should we write first? BB: '53 – 4, 53 – 6, ...'</p> <p>Ps continue saying subtractions (without the results) round the class and T writes in order on BB. (9 subtractions)</p> <p>Are any more possible? (No – 3 subtractions for each of the 3 numbers on the LHS, i.e. 3 lots of 3, or 3 times 3 = 9)</p> <p style="text-align: right;">5 min</p>	<p>Whole class activity</p> <p>Agreement, checking praising</p> <p>At a good pace</p> <p>BB:</p> <table style="width: 100%; border: none;"> <tr> <td style="padding-right: 20px;">53 – 4</td> <td style="padding-right: 20px;">65 – 4</td> <td>82 – 4</td> </tr> <tr> <td>53 – 6</td> <td>65 – 6</td> <td>82 – 6</td> </tr> <tr> <td>53 – 12</td> <td>65 – 12</td> <td>82 – 12</td> </tr> </table> <p>Praise if Ps reason this without help!</p>	53 – 4	65 – 4	82 – 4	53 – 6	65 – 6	82 – 6	53 – 12	65 – 12	82 – 12

Bks</i>.</p>																																	

Y2		<i>Lesson Plan</i> 90
<i>Activity</i>	Practice, revision, activities, consolidation <i>PbY2b, page 90</i>	<i>Notes</i>

<h1>Y2</h1>	<p>R: Addition; shortening addition (multiplication) C: Multiplication and division in context (2, 5 and 10) E: <i>Multiplication sign. Multiplication table</i></p>	<h2>Lesson Plan 91</h2>
Activity	<p>1</p> <p>Introducing multiplication BB: * * * * * * * * * *</p> <p>T has BB already prepared. Ps copy pattern on desks with unit cubes (or items from their collection). Who can tell me an addition about this diagram? Who knows another? BB: $2 + 2 + 2 + 2 + 2 = 10$ $5 + 5 = 10$ Ps write additions in <i>Ex. Bks</i> too. How many times have we added 2 (5)? (5 times, 2 times) We can write the additions in a shorter way as multiplications: BB: 5 times 2 = 10 2 times 5 = 10 Instead of writing 'times' we can use a multiplication sign like this. (T holds up 'x' sign card.) Find it in your sign card set and hold it up. BB: $5 \times 2 = 10$ $2 \times 5 = 10$ Let's read them together: 'five times two equals ten; two times five equals ten'. Copy the multiplications into your <i>Ex. Bks</i>. using the multiplication sign instead of the word 'times'. <p style="text-align: right;">5 min</p></p>	<p>Notes</p> <p>Whole class activity T makes sure that Ps have correct number and pattern Ps move cubes into 5 groups of 2, then 2 groups of 5. Individual work, monitored T demonstrates on BB In unison Ps make equations on desks too In unison Individual work, monitored (Ps write date and lesson no.)</p>
2	<p>PbY2b, page 91, Q.1</p> <p>Read: <i>Peter is putting his socks into pairs. Complete the table.</i> How many socks does Peter have in the first column? (11) Put 11 cubes (counters, etc) on your desk and then put them into pairs. How many complete pairs are there? (5: 2nd row of table) How many are left over (remain)? (1: bottom row of table). Ps fill in rest of table, using cubes to help them if necessary. Review at BB with whole class. Mistakes corrected by demonstration. We could say each column as a multiplication about '2'. A, come and write the first one using the multiplication sign: $5 \times 2 + 1 = 11$. Is A correct? Let's all read it together. 'five times two plus . . . eleven' Different Ps say multiplications about the other columns and T writes on BB: $4 \times 2 = 8$, $1 \times 2 = 2$, $1 \times 2 + 1 = 3$, $8 \times 2 + 1 = 17$, $9 \times 2 = 18$, $2 \times 2 + 1 = 5$, $6 \times 2 + 1 = 13$, $7 \times 2 = 14$, $0 \times 2 + 1 = 1$ What kind of numbers have 1 remaining when put into pairs? (odd) <p style="text-align: right;">10 min</p></p>	<p>Whole class introduction Drawn on BB or use enlarged copy master or OHP Discussion, demonstration Individual work, monitored Reasoning, agreement, checking, self-correcting In unison At a good pace Class agrees/disagrees Class shouts out in unison</p>
3	<p>Multiplications</p> <p>T draws 20 dots on BB and Ps copy in <i>Ex. Bks</i>. BB?  $10 \times 2 = 20$ $2 \times 10 = 20$</p> <p>T instructs Ps to circle the dots in groups of 2 and to write a multiplication about it, using the multiplication sign. Then Ps circle the dots in groups of 10 and write a multiplication about it also. Review at BB with whole class. Ps come out to show on BB. Class agrees/disagrees. Does it matter in which order we write the numbers in a multiplication? (No – the result is the same.) <p style="text-align: right;">14 min</p></p>	<p>Individual work, monitored, helped Ps can also show on desk with counters (cubes, etc) Reasoning, agreement, checking, praising BB: $10 \times 2 = 2 \times 10 = 20$ (Only matters if an equation <u>must</u> match a picture)</p>

Y2		<i>Lesson Plan 91</i>
Activity 4	<p>PbY2b, page 91</p> <p>Q.2 Read: <i>How much money is in each purse? Fill in the missing numbers.</i></p> <p>Review at BB with whole class. Who can write the equations using the multiplication sign? (Ps come out to BB, other Ps write in Pbs.)</p> <p>What is missing from the equations if the purses have real money in them? (units: p) Let's write in the units too.</p> <p>Discussion about where the units should be written.</p> <p style="text-align: right;"><i>18 min</i></p>	<p style="text-align: center;">Notes</p> <p>Individual work, monitored Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising</p> <p>BB: a) $5 \times 1 \text{ p} = 5 \text{ p}$ b) $5 \times 5 \text{ p} = 25 \text{ p}$ c) $5 \times 2 \text{ p} = 10 \text{ p}$ d) $5 \times 10 \text{ p} = 50 \text{ p}$</p>
5	<p>Interlude</p> <p>Action song</p> <p style="text-align: right;"><i>20 min</i></p>	Whole class in unison
6	<p>PbY2b, page 91</p> <p>Q.3 Read: <i>Peter and Linda are packing lettuces into boxes. Fill in the missing numbers. Who packed more lettuces? Write in the missing sign between them.</i></p> <p>Review at BB with whole class. Who can write the equations using the multiplication sign? (Ps come out to BB, other Ps write in Pbs.) Elicit that $5 \times 4 = 4 \times 5 = 20$.</p> <p>T tells class that '5×4' can be read as 'five times four' or 'five multiplied by four'; '4×5' can be read as 'four times five' or 'four multiplied by five'.</p> <p style="text-align: right;"><i>25 min</i></p>	<p>Individual work, monitored Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising</p> <p>BB: <u>Peter</u> <u>Linda</u></p> <p style="margin-left: 100px;">$\underbrace{5 \text{ times } 4}_{20} = \underbrace{4 \text{ times } 5}_{20}$</p> <p style="margin-left: 100px;">$5 \times 4 = 4 \times 5 = 20$</p>
7	<p>PbY2b, page 91</p> <p>Q.4 Read: <i>Draw a line 10 cm long. Divide it up into 2 cm segments.</i></p> <p>T reminds Ps how to draw a line of a certain length accurately. Ps draw 10 cm line, then draw a 'tick' at every 2 cm.</p> <p>How many 2 cm segments did you draw? (5) Who can come and write a multiplication about it? Who agrees? Who thinks something else?</p> <p style="text-align: right;"><i>30 min</i></p>	<p>Ps should all have rulers on desks</p> <p>Individual work, monitored, helped. Encourage neatness</p> <p>T (P) demonstrates on BB using BB ruler</p> <p>BB:  $5 \times 2 \text{ cm} = 2 \text{ cm} \times 5 = 10 \text{ cm}$</p>
8	<p>2 times table</p> <p>T writes on BB, Ps in Ex. Bks. T starts and Ps dictate what to write next.</p> <p>BB: $1 \times 2 = 2 \times 1 = 2$ $6 \times 2 = 2 \times 6 = 12$ $2 \times 2 = \dots$ $7 \times 2 = \dots$</p> <p>Ps demonstrate some of the multiplications. (e.g. pairs at front of class).</p> <p style="text-align: right;"><i>35 min</i></p>	<p>Individual work, monitored, helped</p> <p>Ex. Bks should have squared paper: 1 digit (sign) per square</p> <p>Demonstration, discussion</p>
9	<p>Multiplication table (OHT 14, Txt 2, page 29, Q.2)</p> <ul style="list-style-type: none"> • What do you notice about this multiplication table? (Ask many Ps) • Show me where to find 2×1, 2×2, 2×3, ..., 2×10 • What kind of numbers are they? (2, 4, 6, ..., 20; even numbers) • How can we find the answer to 7×2? etc. (Ps to BB to show) • Colour in the numbers for which you already know the multiplication. • Let's read out the <u>row</u> of 2's: '2 times 0 = 0, 2 times 1 = 2, ...' • Let's read out the <u>column</u> of 2's: '0 times 2 = 0, 1 times 2 = 2, ...' <p style="text-align: right;"><i>45 min</i></p>	<p>Whole class discussion. Praise all contributions</p> <p>Use the yellow strips cut from OHT to highlight relevant row and column, or use copy master</p> <p>Individual work, monitored (Ps have own copy on desks)</p> <p>In unison. Praising</p>

Y2		<i>Lesson Plan 92</i>
Activity	<p>This sign (T points) is called the division sign. Find it in your set of sign cards and hold it up. Make this equation on your desks with cards. T asks individual Ps to read it aloud.</p> <p>b) Read: <i>Exchange these ten 1 p coins for 2 p coins.</i> <i>Continue the drawing.</i></p> <p>T (or P) circles another group on BB before Ps continue. A, how many 2 p coins did you draw? (5) Who agrees? Who thinks something else?</p> <p>We can say that 5 times 2 p = 10 p (T points to 2 p coins) We can also say that 2 p is contained in 10 p five times, or 2 p can be taken away from 10 p five times. BB: $10\text{ p} - 2\text{ p} - 2\text{ p} - 2\text{ p} - 2\text{ p} - 2\text{ p} = 0$</p> <p>We can say that 10 divided by 2 equals 5. What do the numbers actually mean? ($10\text{ p} \div 2\text{ p} = 5\text{ groups}$)</p> <p style="text-align: right;"><i>18 min</i></p>	<p style="text-align: center;">Notes</p> <p>Individual work, monitored, helped</p> <p>T should have real 1 p and 2 p coins with which to demonstrate</p> <p>Discussion, agreement, checking, praising</p> <p>BB: $5 \times 2\text{ p} = 10\text{ p}$</p> <p>T takes away 2 p at a time and Ps say how many are left Ps: '8 p, 6 p, 4 p, 2 p, 0 p'</p> <p>BB: $10 \div 2 = 5$ Discussion, agreement</p>
4	<p>Interlude Song or rhyme</p> <p style="text-align: right;"><i>20 min</i></p>	Whole class in unison
5	<p>Practical consolidation</p> <p>Ps have 20 counters (or items from their collection) and 5 empty containers (bags, boxes, plastic cups) on desks.</p> <p>a) I want you to put 5 counters in a bag, then 5 counters in another bag until the counters are used up. See how many bags you fill. B, how many bags did you fill? (4) Who agrees? How can we write it as an addition (multiplication)? Ps come out to write on BB, and class agrees/disagrees.</p> <p>We can say that 4 times 5 counters = 20 counters, or 5 counters are contained in 20 counters 4 times, or 5 counters can be taken away from 20 counters four times. BB: $20 - 5 - 5 - 5 - 5 = 0$</p> <p>We can also say that 20 counters divided into groups of 5 counters equals 4. C, come and write it as a division. Is C correct?</p> <p>b) Empty all the counters out again. This time I want you to share the 20 counters equally among all the 5 bags. How can we do that? (Put 1 counter in each of the 5 bags, then another in each of the 5 bags until they are used up.) See how many counters will be in each bag.</p> <p>D, how many counters are in each of your bags? (4) Who agrees? How can we write it as an addition (multiplication)? Ps come out to write on BB, and class agrees/disagrees.</p> <p>We can say that 5 times 4 counters = 20 counters, or 4 counters are contained in 20 counters 5 times, or 4 counters can be taken away from 20 counters five times. BB: $20 - 4 - 4 - 4 - 4 = 0$</p> <p>We can also say that 20 counters divided by 5 equals 4 counters. C, come and write it as a division. Is C correct?</p> <p>(Or done as a whole class activity with 5 Ps at front of class and, e.g. 20 balloons, flowers, soft toys on elastic – anything exciting!)</p> <p style="text-align: right;"><i>30 min</i></p>	<p>Individual work but class kept together</p> <p>Monitored, helped</p> <p>BB: $5 + 5 + 5 + 5 = 20$ $4 \times 5 = 20$</p> <p>T shows pre-prepared plastic bags, each with 5 counters T takes away 5 counters at a time. Ps say how many are left Ps: '15, 10, 5, 0'</p> <p>BB: 20 counters \div 5 counters = 4 (times)</p> <p>Monitored, helped</p> <p>BB: $4 + 4 + 4 + 4 + 4 = 20$ $5 \times 4 = 20$</p> <p>T takes away 4 counters at a time. Ps say how many are left Ps: '16, 12, 8, 4, 0'</p> <p>BB: $20 \div 5 = 4$</p> <p>(Ps come out to divide up/ share out the items in the two ways given above)</p>

Activity		Notes
<p>6</p>	<p>PbY2b, page 92</p> <p>Q.3 Read: <i>Exchange these thirty 1 p coins for 5 p coins.</i></p> <p>T points out similarity to Q.2b and makes sure everyone understands what to do. (T can show real 1 p and 5 p coins)</p> <p>Review at BB with whole class. E, how many 5 p coins did you draw? (6) Who agrees? Who thinks something else?</p> <p>Let's fill in the missing numbers together.</p> <p>Ps come out to read statements and to fill in missing numbers. Class agrees/disagrees. Ps write numbers in <i>Pbs</i> too.</p> <p>BB: 30 1 p coins can be exchanged for <u>6</u> 5 p coins because $6 \times 5 \text{ p} = 30 \text{ p}$. 30 p contains 5 p <u>6</u> times.)</p> <p>Who can think of a division about it? T asks several Ps and writes the two version on the BB. Ps copy down in <i>Pbs</i>.</p> <p style="text-align: right;"><i>35 min</i></p>	<p>Individual work in circling and drawing coins</p> <p>Monitored</p> <p>Discussion, agreement, checking, praising</p> <p>Whole class activity</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>BB: $6 \times 5 \text{ p} = 30 \text{ p}$ $30 \text{ p} \div 5 \text{ p} = 6$ (times) $30 \text{ p} \div 6 = 5 \text{ p}$</p>
<p>7</p>	<p>5 times table</p> <p>T writes on BB, Ps in <i>Ex. Bks</i>. T starts and Ps dictate what to write next, following the pattern.</p> <p>BB: $1 \times 5 = 5 \times 1 = 5$ $6 \times 5 = 5 \times 6 = 30$ $2 \times 5 = \dots$ $7 \times 5 = \dots$</p> <p>T asks Ps to demonstrate some of the multiplications to show what they mean (e.g. Ps hold hands in 5's at front of class, or draw on BB, or show with counters (sticks, etc.) on desks.</p> <p style="text-align: right;"><i>40 min</i></p>	<p>Individual work, monitored, helped</p> <p><i>Ex. Bks</i> should have squared paper: 1 digit (sign) per square</p> <p>Demonstration, discussion</p> <p>(Ps may have \times tables on desks if necessary)</p>
<p>8</p>	<p>Division table for 5</p> <p>T writes on BB, Ps in <i>Ex. Bks</i>. T starts and Ps dictate what to write next, following the pattern.</p> <p>BB: $5 \div 5 = 1$ $30 \div 5 = 6$ $10 \div 5 = 2$ $35 \div 5 = \dots$ $15 \div 5 = 3$</p> <p>Let's look at our multiplication table. Where can we find the divisions? (e.g. Elicit that $35 \div 5 = 7$ is the same row, column as $7 \times 5 = 35$)</p> <p style="text-align: right;"><i>45 min</i></p>	<p>Individual work, monitored, helped</p> <p>Use <i>OHT 14</i> or copy master</p> <p>Ps have own copies on desks (can be stuck into back of <i>Pbs</i> or <i>Ex. Bks</i> and numbers along top and LHS coloured)</p> <p>Discussion, reasoning, agreement</p>

<h1>Y2</h1>	<p>R: Sequences. Mental calculation C: Multiplication and division (in context): 2, 5, 10; x table E: <i>Half, fifth, tenth</i></p>	<h2>Lesson Plan 93</h2>
Activity	Notes	
<p>1</p>	<p>Oral practice</p> <p>a) Let's say the multiplication table for 2 (5, 10) in increasing order: 'one times two is two, two times two is four, three times two is ...'</p> <p>b) T says a multiplication for 2, 5 or 10 (e.g. 3×5) P says answer (15)</p> <p>c) T says a division for 2, 5 or 10. Ps volunteer answers and explain reasoning, checking with multiplication. (e.g. $24 \div 2 = 12$ because $12 \times 2 = 24$) T uses the terms 'one half', 'one fifth', 'one tenth' too. (e.g. one fifth of 10)</p> <p style="text-align: right;"><i>5 min</i></p>	<p>Whole class activity In unison, at speed</p> <p>Ps hold up hands to volunteer. Class corrects mistakes.</p> <p>Refer to \times table (<i>OHT 14</i> or copy master) as a check</p> <p>Ps can have own copies too</p>
<p>2</p>	<p>10 times table</p> <p>T writes on BB, Ps in <i>Ex. Bks.</i> T starts and Ps dictate what to write next, following the pattern.</p> <p>BB: $1 \times 10 = 10 \quad 10 \times 1 = 10$ $6 \times 10 = 60 \quad 10 \times 6 = 60$ $2 \times 10 = 20 \quad \dots$ $7 \times 10 = 70 \quad \dots$</p> <p>T asks Ps to demonstrate some of the multiplications to show what they mean (e.g. Ps stand up in 10's, or draw dots or write additions on BB)</p> <p style="text-align: right;"><i>13 min</i></p>	<p>Individual work, monitored</p> <p><i>Ex. Bks</i> should have squared paper: 1 digit (sign) per square</p> <p>Demonstration, discussion, checking, praising</p>
<p>3</p>	<p>Division table for 10</p> <p>T writes on BB, Ps in <i>Ex. Bks.</i> T starts and Ps dictate what to write next, following the pattern.</p> <p>BB: $10 \div 10 = 1$ \dots $20 \div 10 = 2$ \dots $30 \div 10 = 3$ $100 \div 10 = 10$</p> <p>Let's look at our multiplication table. Where can we find the divisions? (e.g. Elicit that $70 \div 10 = 7$ is the same row/column as $7 \times 10 = 70$)</p> <p>Talk about division being the opposite of multiplication, just as subtraction is the opposite of addition.</p> <p style="text-align: right;"><i>18 min</i></p>	<p>Individual work, monitored</p> <p>Use <i>OHT 14</i> or copy master</p> <p>Ps have own copies on desks (or stuck into back of <i>Pbs</i> or <i>Ex. Bks.</i>)</p> <p>Discussion, reasoning, checking, agreement</p> <p>BB: e.g. $5 + 2 = 7$ $5 \times 2 = 10$ $7 - 2 = 5$ $10 \div 2 = 5$</p>
<p>4</p>	<p>Interlude</p> <p>Physical exercises to music</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Whole class in unison</p>
<p>5</p>	<p>Jumping along the number line</p> <p>Let's jump along the number line:</p> <p>a) from zero in 5's to 45 (T shows jumps, Ps recite numbers reached) After how many jumps did we reach 45? (9) Who can come and write it as a multiplication (division)? Who agrees?</p> <p>b) from 35 back to zero in 5's (T shows jumps, Ps recite numbers) After how many jumps did we reach 0? (7) Who can come and write it as a division? Who agrees? How can we check it?</p> <p>c) from zero to 100 in 10's d) from 100 back to zero in 10's</p> <p style="text-align: right;"><i>25 min</i></p>	<p>Whole class activity</p> <p>T shows jumps on number line, Ps recite in chorus</p> <p>BB:</p> <p>a) 9×5 (units) = 45 (units) 45 (units) $\div 5$ (units) = 9</p> <p>b) 35 (units) $\div 5$ (units) = 7 7×5 (units) = 35 (units)</p> <p>c) 10×10 (units) = 100 (units) 100 units $\div 10$ (units) = 10</p>

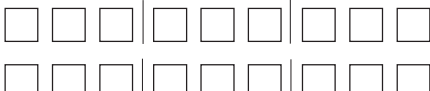

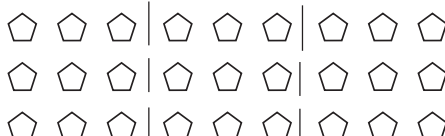

Y2		<i>Lesson Plan 93</i>
Activity 6	<p>PbY2b, page 93</p> <p>Q.1 Read: <i>Write an addition, a multiplication and a division about each picture.</i></p> <p>Deal with one part at a time. Review at BB with whole class.</p> <p>BB: e.g.</p> <p>a) $9 + 9 + 9 + 9 + 9 = 45$, $5 \times 9 = 45$, $45 \div 5 = 9$</p> <p>b) $2 + 2 + 2 + 2 + 2 = 10$, $5 \times 2 = 10$, $10 \div 5 = 2$</p> <p>c) $5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40$, $8 \times 5 = 40$, $40 \div 8 = 5$</p> <p>d) $10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 = 80$, $8 \times 10 = 80$, $80 \div 8 = 10$</p> <p style="text-align: right;">30 min</p>	<p style="text-align: center;">Notes</p> <p>Individual work, monitored, helped</p> <p>Use enlarged copy master/OHP</p> <p>Discussion, agreement, checking, self-correcting</p> <p>(or $10 + 10 + 10 + 10 = 40$, $20 + 20 = 40$, etc.)</p> <p>Praising</p>
7	<p>PbY2b, page 9</p> <p>Q.2 Read: <i>On a school trip, 18 rolls were divided equally among the children so that each child had 2 rolls each.</i></p> <p><i>How many children were on the trip?</i></p> <p>Let's see if you can work this out for yourselves! You may draw circles around the rolls to help you. Write a division and then check you are correct with a multiplication.</p> <p>Review at BB with whole class, with Ps coming out to explain reasoning and what they did to check it. Mistakes corrected.</p> <p style="text-align: right;">35 min</p>	<p>Individual work, monitored, helped</p> <p>BB: Number of rolls: 18 Each child has: 2</p> <p style="text-align: center;">$18 \div 2 = 9$</p> <p>Check: $9 \times 2 = 18$</p> <p>Answer: 9 pupils</p> <p>Class/disagrees. Self-correction</p>
8	<p>PbY2b, page 93</p> <p>Q.3 Read: <i>Grandma cooked 30 dumplings.</i></p> <p><i>She gave 5 dumplings to each of her grandchildren.</i></p> <p><i>How many grandchildren does she have?</i></p> <p>Let's see how quickly you can solve this problem! You may draw circles around the dumplings to help you. Write a division and then check it with a multiplication.</p> <p>Review at BB with whole class, with Ps coming out to explain reasoning and what they did to check it. Mistakes corrected.</p> <p>What information is missing from this problem? (Whether or not all the dumplings were used up, e.g. Grandma could have 4 grandchildren and there could be 10 dumplings left over.)</p> <p style="text-align: right;">40 min</p>	<p>Individual work, monitored</p> <p>BB: Number of dumplings: 30 Each grandchild has: 5</p> <p style="text-align: center;">$30 \div 5 = 6$</p> <p>Check: $6 \times 5 = 30$</p> <p>Answer: 6 grandchildren</p> <p>Agreement. Self-correction</p> <p>Discussion. Ask several Ps what they think</p> <p>Praising if P thinks of it.</p>
Extension	<p>PbY2b, page 93</p> <p>Q.4 Read: <i>Colour in one half, one fifth and one tenth of the ribbon.</i></p> <p>How many squares are there in the ribbon? (10)</p> <p>Colour in one half of the ribbon on the LHS and write '1 half' below it. X, how many squares did you colour? (5) Who disagrees? Z, come and write a division about it. Is Z correct? Let's check with a multiplication.</p> <p>Similarly for one fifth and one tenth.</p> <p>What do you do when you find one half (one fifth, one tenth) of something? [Divide by 2 (5, 10)]</p> <ul style="list-style-type: none"> • What is half of 4 (6, 20, 100)? (2, 3, 10, 50) • What is one fifth of 15 (20, 30, 50)? (3, 4, 6, 10) • What is one tenth of 20 (30, 70, 100)? (2, 3, 7, 10) <p style="text-align: right;">45 min</p>	<p>Individual trial, monitored, helped. Discussion at BB</p> <p>BB:</p> <p></p> <p><i>1 half:</i> $10 \div 2 = 5$ $5 \times 2 = 10$</p> <p></p> <p><i>1 fifth:</i> $10 \div 5 = 2$ $2 \times 5 = 10$</p> <p></p> <p><i>1 tenth:</i> $10 \div 10 = 1$ $1 \times 10 = 10$</p>

Activity		Notes
1	Sequences T starts a sequence, a P continues it, then T asks another P to continue, then another, etc. to 100 (or further if Ps can do it) <ul style="list-style-type: none"> • 0, 2, 4, 6, . . . What are these numbers? (Multiples of 2, even) • 0, 5, 10, 15, . . . What are these numbers? (Multiples of 5) • 0, 10, 20, . . . What are these numbers? (Multiples of 10) Who can come and find them on the multiplication table? <div style="text-align: right;">_____ 3 min _____</div>	Whole class activity At speed Praising <u>Without</u> the aid of a multiplication table Use <i>OHT 14</i> with yellow strips to highlight
2	Multiplication Open your books at your multiplication table. Check the numbers you coloured before. Are you <u>sure</u> that you know these multiplications by heart? You might be able to colour new numbers now ! Let's see what you know! T walks round class saying multiplications for 2, 5 and 10, pointing to different Ps in turn to give the answer. Class corrects wrong answers. If nobody knows, refer to <i>OHT 14</i> . Who knows a multiplication that we haven't mentioned yet? Come and show it to us on the multiplication table. <div style="text-align: right;">_____ 8 min _____</div>	Whole class activity (Give Ps 2 minutes to make sure that they know them) Praise every correct product Encourage Ps who make a mistake (but take note and ask them again unexpectedly at other times) Extra praise if correct
3	Division T starts a division by 2, 5 or 10 and chooses a P to answer. If P answers correctly, he/she chooses the next P. If answer is wrong, another P corrects it and answers the next division. Refer to multiplication table if necessary. Ask Ps to check with a multiplication if unsure. <div style="text-align: right;">_____ 12 min _____</div>	Whole class activity At a good pace! Praising, encouraging
4	PbY2b, page 94 Q.1 Read: <i>Change 35 p into 5 p coins.</i> <i>Divide 35 p into 5 equal parts.</i> Who can tell me something about the two pictures? (Both the same, 5 rows of 7 coins, 35 coins altogether) Do we have to do the same for each picture? (No, in the LHS we are dividing up the coins into columns of 5 and in the RHS we are dividing up the coins into rows of 7) See if you can fill in the missing numbers on your own. Check you are correct by writing a multiplication. Review at BB with whole class. Ps come out to explain their reasoning and class agrees/disagrees. <div style="text-align: right;">_____ 18 min _____</div>	Individual work, monitored, helped Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising BB: 5 is contained in 35 <u>7</u> times One fifth of <u>35</u> = <u>7</u> <u>35</u> divided by 5 = <u>7</u> <u>35</u> ÷ 5 = <u>7</u> Check: $7 \times 5 = 35$
5	Interlude Action song/rhyme <div style="text-align: right;">_____ 20 min _____</div>	Whole class in unison
6	PbY2b, page 94 Q.2 Read: <i>Fill in the missing numbers. Colour the coins which make the equation true.</i> Do part a) with whole class so that they understand what to do. (Make sure that they know to colour <u>only</u> as many coins as the number they write in the box.)	Whole class introduction Drawn on BB or use enlarged copy master or OHP (or cardboard coins stuck to BB) P at BB, rest of class in <i>Pbs</i>

Y2		Lesson Plan 94
<p>Activity</p>	<p>Ps do parts b) to f) on their own. Review at BB with whole class. Mistakes corrected (If problems, continue as whole class activity.) Ask Ps to say a division about each part too. BB:</p> <p>a) $50 = \boxed{5} \times 10$ 10 10 10 10 10 10 10 10 10 10</p> <p>b) $80 = \boxed{8} \times 10$ 10 10 10 10 10 10 10 10 10 10</p> <p>c) $25 = \boxed{5} \times 5$ 5 5 5 5 5 5 5 5 5 5</p> <p>d) $40 = \boxed{8} \times 5$ 5 5 5 5 5 5 5 5 5 5</p> <p>e) $50 = \boxed{10} \times 5$ 5 5 5 5 5 5 5 5 5 5</p> <p>f) $0 = \boxed{0} \times 5$ 5 5 5 5 5 5 5 5 5 5</p> <p>T says other equations and Ps give correct number of coins. Who can explain why the same number of coins were coloured in parts a) and c)? parts b) and d)? (The same number of coins of half the value gives half the amount.)</p> <p style="text-align: right;">28 min</p>	<p>Notes</p> <p>Individual work, monitored</p> <p>Discussion, agreement, checking, praising</p> <p>e.g. $6 \times 10 = 60$: How many 10 p coins? (6) $2 \times 10 = 20$: How many 10 p (5 p) coins? (2, 4)</p> <p>Praising</p>
<p>7</p>	<p>PbY2b, page 94</p> <p>Q.3 Read: <i>Write in the missing numbers.</i> <i>Learn and practise the 2 and 5 times tables.</i></p> <p>Deal with one column at a time. Review orally round class. Elicit that the answers to the multiplications (i.e. products) are the same as the first numbers in the divisions.</p> <p>In the next 2 minutes try to learn the multiplications by heart and then we will try to say them without looking at the books!.</p> <p>Close your <i>Pbs</i> and let's say the 2 times table together. 'zero times two equals zero, one times two equals two . . .'</p> <p>Now let's say the divisions for 2: 'zero divided by two equals zero, . . .'</p> <p>Repeat for 5. If you have not learned them yet, practise at home.</p> <p style="text-align: right;">36 min</p>	<p>Individual work, monitored</p> <p>Class points out mistakes Ps correct their errors</p> <p>T asks for quiet so that everyone can concentrate</p> <p>In unison, at speed</p> <p>In unison, at a good pace, with T's help</p> <p>Praising</p>
<p>8</p>	<p>Problem</p> <p><i>I went into a sweetshop where you can choose your own sweets. I put the same kind of sweets in a bag.</i></p> <p><i>How many sweets did I buy if each sweet cost 5 p and I paid 20 p?</i></p> <p>Show me with number cards . . . now! (4)</p> <p>X, explain how you got your answer. Who agrees? Repeat for other totals.</p> <p style="text-align: right;">40 min</p>	<p>Whole class activity</p> <p>T repeats slowly</p> <p>In unison</p> <p>BB: $20 \div 5 = 4$</p> <p>Reasoning, agreement, checking, praising</p>
<p>9</p>	<p>Challenge</p> <p>Who is clever enough to calculate the answers to these?</p> <p>BB: $2 \times 50 =$ $5 \times 11 =$ $44 \div 2 =$ $100 \div 5 =$ $2 \times 11 =$ $5 \times 20 =$ $*98 \div 2 =$ $55 \div 5 =$ $2 \times 32 =$ $*5 \times 12 =$ $*31 \div 2 =$ $22 \div 5 =$</p> <p>Ps come out to choose one to try, explaining reasoning to class. Class agrees/disagrees. Who can do it another way? (using addition, double, half, fifth, subtraction, decomposition, inverse operations, etc.)</p> <p>*e.g. $98 = 100 - 2$, $12 = 10 + 2$, $31 = 20 + 10 + 1$ (10 + 5 + half, or (50 - 1) (50 + 10) $2 \times 15 + 1$; Ans: 15, remainder 1)</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>Encourage Ps to think logically and to use what they already know.</p> <p>T gives hints if necessary</p> <p>Trials, reasoning, discussion, agreement, checking</p> <p>Praising if Ps reason without help</p>

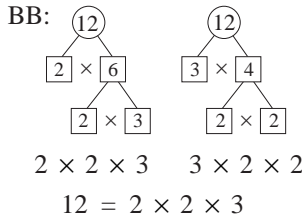

Y2		<i>Lesson Plan</i> 95
<i>Activity</i>	Practice, revision, activities, consolidation <i>PbY2b, page 95</i>	<i>Notes</i>

Y2		<i>Lesson Plan 96</i>
Activity 6	Number strips Ps have numbers strips (or coloured plastic cubes stuck together in 2's, 3's, 4's, etc. or Cuisenaire rods) on desks. a) Let's put 3 of the same length in a long line and see how many they make altogether. (Start with three '1's, then three '2's, etc.) Who can say a multiplication about it? T writes on BB (e.g. $3 \times 1 = 3$, $3 \times 2 = 6$, $3 \times 3 = 9$, . . .) and Ps write in <i>Ex. Bks.</i> b) Let's put different numbers of 3 (number strips, rods or plastic cubes stuck together in 3's) in a long line and see how many they make altogether. (Start with one '3', then two '3's, etc.) Who can say a multiplication about it? T writes on BB (e.g. $1 \times 3 = 3$, $2 \times 3 = 6$, $3 \times 3 = 9$, etc), and Ps write in <i>Ex. Bks.</i> Who can tell me some divisions too? Class agrees/disagrees. (If problems, Ps can confirm with number strips/cubes/rods on desks.) <p style="text-align: right;">30 min</p>	Notes Individual (or paired) work, instructed by T (Materials already prepared and on Ps' desks) T can demonstrate with large strips stuck to BB or use normal sized strips or rods with an OHP Ps go as far as they are able in a set time limit Discussion, agreement, checking, praising BB: e.g. $6 \div 3 = 2$, $15 \div 5 = 3$, etc.
7	PbY2b, page 96 Q.2 Read: <i>Vera has made different shapes using 3 sticks for each shape.</i> <i>How many sticks will she need to make several shapes? Complete the table.</i> Review at BB with whole class. Mistakes corrected. <ul style="list-style-type: none"> • Who can say a multiplication and division about one of the columns? Class agrees/disagrees. Who knows another one? • Who can tell us the rule for the table? (Number of sticks = $3 \times$ number of shapes) • What kind of numbers are in the bottom row of the table? (multiples of 3) Let's say them in decreasing order. (30, . . .) <p style="text-align: right;">35 min</p>	Individual work, monitored, helped. Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising e.g. $10 \times 3 = 30$, $30 \div 3 = 10$ T points and class recites in unison, at speed
8	PbY2b, page 96, Q.3 Read: <i>Claire lives in a 10-storey block of flats. From the back garden she can see 3 windows on each floor.</i> a) <i>How many windows can Claire see on:</i> i) <i>3 floors? Show me with number cards . . . now! (9)</i> X , come and explain how you got your answer and write it as a multiplication. Is X correct? T deals with any mistakes they made. Ps correct own work. Deal with other parts in a similar way. (Or done as individual work, monitored, helped and reviewed at BB with whole class) <p style="text-align: right;">40 min</p>	Whole class activity Use enlarged copy master/OHP T or P reads questions, Ps write multiplication in <i>Pbs</i> In unison Reasoning, agreement, checking, praising BB: a) i) $3 \times 3 = 9$, etc. b) i) $21 \div 3 = 7$, etc. Keep up a good pace!
9	PbY2b, page 96, Q.4 T talks about the multiplication table first, eliciting that the rows and columns showing the multiples of 2, 5 and 10 are already filled in because Ps should already know them. What do you notice about the row and column for the multiples of 3? (6, 15 and 30 are already filled in) Why? (6 is also a multiple of 2, 15 is also a multiple of 5, 30 is also a multiple of 10 (and of 5)). Ps fill in the missing multiples of 3. Let's say them together in increasing (decreasing) order. (Ps correct any mistakes in table in <i>Pbs.</i>) <p style="text-align: right;">45 min</p>	Whole class discussion Drawn on BB or use enlarged copy master or OHP Ps come out to point and explain Individual work, monitored In unison, at speed. Praising

<h1>Y2</h1>	<p>R: Operations already learned C: Multiplication and division by 3 E: <i>Third</i></p>	<h2>Lesson Plan 97</h2>																								
<p>Activity 1</p>	<p>Grouping in 3's</p> <p>T has shapes stuck (drawn) on BB. Ps come out to arrange in groups of 3 and write a multiplication and division about it.</p> <p>BB: a)  $2 \times 3 = 6$ $6 \div 3 = 2$</p> <p>b)  $3 \times 3 = 9$ $9 \div 3 = 3$</p> <p>c)  $6 \times 3 = 18$ $18 \div 3 = 6$</p> <p>d)  $9 \times 3 = 27$ $27 \div 3 = 9$</p> <p>If we change one third of the number of shapes into black ones, how many triangles (circles, squares, pentagons) will be black? (2, 3, 6, 9) Will we need to write new divisions about it? (No, the divisions already on BB also show the new arrangements.)</p> <p style="text-align: right;"><i>8 min</i></p>	<p>Notes</p> <p>Whole class activity T has BB ready prepared (can use number cards) Shapes need not be drawn/ stuck in a regular pattern Ps come out to show groups (by drawing or rearranging) Class agrees/disagrees with equations Ps write equations in <i>Ex. Bks</i> (first writing the date and lesson number at top of page)</p> <p>Done at a good pace</p> <p>Discussion, agreement, checking by demonstration, praising</p>																								
<p>2</p>	<p>PbY2b, page 97, Q.1</p> <p>T explains task. Ps come out to choose an animal and show its jumps on the number line, e.g. <i>Frog</i>: P points to '6' on the number line. This is how far <i>Frog</i> got to after 1 jump. How far would he have got after 3 jumps? P shows 3 jumps of 6 units each along the number line and the class keeps count. P writes '18' in correct place in table and equation on BB.</p> <p>Continue until all the blanks are completed. (Demonstration is not necessary once T thinks Ps have understood.)</p> <p>Ask Ps to compare the jumps orally using words such as '3 times', 'one third'. Discuss the special case of <i>Snail</i>: after 1 jump he has not moved, so 3 jumps of not moving equals zero. (Ps can jump on the spot 3 times but not move forwards or backwards.)</p> <p><i>Solution:</i></p> <table border="1" data-bbox="383 1624 973 1769"> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>After 1 jump</td> <td>0</td> <td>1</td> <td>2</td> <td>4</td> <td>6</td> <td>7</td> <td>9</td> </tr> <tr> <td>After 3 jumps</td> <td>0</td> <td>3</td> <td>6</td> <td>12</td> <td>18</td> <td>21</td> <td>27</td> </tr> </table> <p style="text-align: right;"><i>14 min</i></p>									After 1 jump	0	1	2	4	6	7	9	After 3 jumps	0	3	6	12	18	21	27	<p>Whole class activity Drawn on BB or use enlarged copy master or OHP Demonstration, agreement BB: $3 \times 6 = 18$, etc. Ps complete table in <i>Pbs</i> too Involve several Ps BB: $3 \times 0 = 0$ Discussion, demonstration Elicit that jumps of 3, 8 and 10 are not shown in table. (Ps could suggest an animal for each)</p>
																										
After 1 jump	0	1	2	4	6	7	9																			
After 3 jumps	0	3	6	12	18	21	27																			
<p>3</p>	<p>PbY2b, page 97 Q.2 Read: <i>Write multiplications and division about the pictures.</i></p> <p>Let Ps try without any help first. Review at BB with whole class. Elicit that in:</p> <p>a) there are 3×4 things in a 2×6 pattern b) there are 5×6 (or 10×3) shapes in a 3×10 pattern</p> <p>Praise the unexpected (e.g. 1×12; 2×15; $2 \times 3 \times 5$)</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Individual trials, monitored Drawn on BB or use enlarged copy master or OHP BB: a) $3 \times 4 = 4 \times 3 = 2 \times 6 = 6 \times 2 = 12$ b) $3 \times 10 = 10 \times 3 = 5 \times 6 = 6 \times 5 = 30$ (plus matching divisions)</p>																								

Y2		<i>Lesson Plan 97</i>
Activity		Notes
4	<p>Interlude</p> <p>Song or rhyme</p> <p style="text-align: right;"><i>22 min</i></p>	Whole class in unison
5	<p>Multiples of 3</p> <p>a) T says a multiplication for '3'. Ps show on desks with counters (cubes, sticks, items from their collection), e.g. 3×4 (3×6, 3×7, 3×9, 3×0).</p> <p>How many do you have altogether? (Ps shout out in unison or show with number cards.) BB: $3 \times 4 = 12$, etc.</p> <p>b) T tells Ps to lay out a certain number of items on desks and to divide them up into groups of 3, e.g. 6 (24, 15, 30)</p> <p>How many is one third of the total number? (Ps shout out in unison or show with number cards.) BB: $6 \div 3 = 2$, etc.</p> <p style="text-align: right;"><i>28 min</i></p>	<p>Individual work but class kept together under T's instructions.</p> <p>Each P should have box of items already on desk</p> <p>Done at a good pace!</p> <p>T monitoring, helping</p> <p>Whole class demonstration if there are problems.</p>
6	<p>PbY2b, page 97</p> <p>Q.3 Read: <i>Fill in the missing numbers. Learn and practise the 3 times table.</i></p> <p>Deal with one column at a time. Review orally round class. Elicit that the answers to the multiplications (products) are the same as the first numbers in the divisions.</p> <p>In the next 2 minutes try to learn the multiplications by heart and then we will try to say them without looking at the books!</p> <p>Close your <i>Pbs</i> and let's say the 3 times table together. 'zero times three equals zero, one times three equals three, . . .'</p> <p>Let's say it another way in a relay, starting with '3 times zero'</p> <p>Now let's say the divisions for 3: 'zero divided by three equals zero, . . .' (Demonstrate this first division if necessary.)</p> <p style="text-align: right;"><i>35 min</i></p>	<p>Individual work, monitored (helped)</p> <p>Class points out mistakes Ps correct their errors</p> <p>T asks for quiet so that everyone can concentrate</p> <p>In unison, at speed</p> <p>One P after another, at speed</p> <p>In unison, at a good pace, with T's help. Praising</p>
7	<p>Problem</p> <p>Listen carefully and show me the answer with number cards when I say.</p> <p>a) <i>Tom has 8 pencils. Ann has 3 times as many as Tom. How many pencils does Ann have?</i></p> <p>Show me with number cards . . . now! (24)</p> <p>X, explain how you got your answer. Who agrees? (Answer in context)</p> <p>b) <i>Jim ate 9 pancakes, which was one third of the number of pancakes Mum had made. How many pancakes did Mum make?</i></p> <p>Show me with number cards . . . now! (27) Y, explain how you got your answer. Who agrees? Who did it another way?</p> <p><i>How many pancakes were left?</i></p> <p>Show me with number cards . . . now! (18) Z, explain how you got your answer. Is Z correct? (Ps repeat answers as sentences in context.)</p> <p style="text-align: right;"><i>40 min</i></p>	<p>Whole class activity</p> <p>Ps repeat in own words.</p> <p>In unison</p> <p>BB: $3 \times 8 = 24$</p> <p>Ps repeat in own words</p> <p>Number cards shown in unison</p> <p>Discussion, agreement, checking, praising</p> <p>BB: $3 \times 9 = 27$ pancakes made $27 - 9 = 18$ pancakes left</p>
8	<p>Multiplication table</p> <p>Open your books at your multiplication table. Colour any new numbers if you are <u>sure</u> you know a multiplication and division about them.</p> <p>Let's see what you know! T walks round class saying multiplications/divisions for 2, 3, 5 and 10. Ps correct wrong answers on \times table.</p> <p style="text-align: right;"><i>45 min</i></p>	<p>Individual work in colouring, monitored (questioned)</p> <p>Check who circled every number in the row and column for 3.</p> <p>Praising, encouraging</p>

Y2	<p>R: Operations already learned</p> <p>C: Multiplication and division by 3</p> <p>E: <i>Factorising. Division with remainder</i></p>	<p><i>Lesson Plan</i></p> <p>98</p>
Activity		Notes
1	<p>Oral practice</p> <p>a) Let's practise our multiplication tables (2, 3, 5, 10) (forwards and backwards) T points to multiples on <i>OHT 14</i> (or copy master)</p> <p>b) T says a multiplication/division already learned. Ps asked either in order round class or randomly. (Divisions checked by next P with a multiplication.) Demonstrate only if there are problems.</p> <p style="text-align: right;">5 min</p>	<p>Whole class activity</p> <p>At speed, in unison</p> <p>Done in good humour – no stress put on Ps!</p> <p>Praising only, encouraging in case of incorrect answers</p>
2	<p>Logic Puzzle (<i>OHT 18, Txt 2, page 77, Q.1, LHS</i>)</p> <p>Look at this puzzle. The four numbers along each line add up to <u>51</u>. (T writes 51 above or below puzzle.)</p> <p>The same colour means the same number. There is another limitation on the number in each rectangle. What does this tell us? (T points to the inequality.) (The numbers in each rectangle must be more than or equal to 10 and less than or equal to 16.)</p> <p>Let's say all the numbers the rectangles could be. '10, 11, 12, 13, 14, 15, 16' (T writes them on the BB.) We have to work out which of these numbers each colour represents.</p> <p>Where should we start? (e.g. on the 2nd row of the inner rectangle, which has 3 '12's already given.) BB: $3 \times 12 + \square = 51$</p> <p>A, come and write in the missing number. (15) Who agrees? Let's check. ($51 - 15 = 36$, $36 \div 3 = 12$) A, write 15 in all the <i>pink</i> rectangles.</p> <p>Where should we go next? (e.g. bottom row) (This could be done first)</p> <p>BB: $\square + 12 + \square + \square = 51$, $3 \times \square + 12 = 51$</p> <p>B, come and write in the missing number. (13) Who agrees? Let's check. ($51 - 12 = 39$, $39 \div 3 = 13$) B, write 13 in all the <i>orange</i> rectangles.</p> <p>Continue in this way until puzzle is completed (e.g. then LH column of inner rectangle to get <i>blue</i>, then vertical row on RHS to get <i>dark green</i>, then slanting row on RHS to get <i>yellow</i>, then slanting row on LHS to get <i>light green</i>).</p> <p style="text-align: right;">12 min</p>	<p>Whole class activity</p> <p>If no OHP, use copy master, enlarged and coloured appropriately</p> <p>BB: $10 \leq \square \leq 16$</p> <p>\square: 10, 11, <u>12</u>, 13, 14, 15, 16</p> <p>In unison</p> <p><i>Solution:</i></p> <p style="padding-left: 40px;">Pink → 15</p> <p style="padding-left: 40px;">Orange → 13</p> <p style="padding-left: 40px;">Blue → 14</p> <p style="padding-left: 40px;">Dark Green → 11</p> <p style="padding-left: 40px;">Yellow → 10</p> <p style="padding-left: 40px;">Light Green → 16</p> <p>Involve as many Ps as possible in discussion/solution</p> <p>Other orders possible – Ps suggest where to go next and what to do as a check</p> <p>Checking, agreement, praising</p> <p>(Practice in addition, subtraction, multiplication and division)</p>
3	<p>PbY2b, page 98</p> <p>Q.1 a) Read: <i>The same shape means the same number. The number in the middle is the sum of the four numbers around it. Fill in the missing numbers.</i></p> <p>Make sure that Ps know what 'sum' means. (Pairs could be an able P working with a less able P.)</p> <p>Review at BB with whole class, a different pair (or P) for each sum. Class confirms/points out errors. (If problems, write additions on BB.)</p> <p>b) Read: <i>The same shape means the same number. The number in the middle is the product of the four numbers around it. Fill in the missing numbers.</i></p> <p>Make sure that Ps know what 'product' means.</p> <p>Review as in a), writing multiplications on BB if necessary.</p> <p style="text-align: right;">20 min</p>	<p>Individual (or paired) trial, monitored</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, reasoning, agreement, checking, praising</p> <p><i>Solution:</i></p> <p>a) $\square = 15$, $\triangle = 16$, $\bigcirc = 18$</p> <p style="padding-left: 20px;">$\square = 17$, $\hexagon = 19$</p> <p>b) $\square = 2$, $\bigcirc = 1$</p> <p style="padding-left: 20px;">$\triangle = 3$, $\triangleleft = 5$</p> <p>Praise Ps who used \times as shorter form of $+$ in part a)</p>
4	<p>Interlude</p> <p>Song, verse, exercises</p> <p style="text-align: right;">22 min</p>	<p>Whole class in unison</p>

Y2		Lesson Plan 98
Activity 5	<p>PbY2b, page 98</p> <p>Q.2 Read: <i>Mrs Squirrel can carry home only 3 acorns at a time. Show how many times she had to go back if she collected:</i> a) 12 acorns b) 24 acorns c) 18 acorns. <i>Write a multiplication and division about each picture.</i></p> <p>Review at BB with whole class: Ps at BB circling, counting groups of 3 and writing equations. Class agrees/disagrees. Mistakes corrected.</p> <p>(Demonstrate with plastic cubes and a P as Mrs Squirrel if problems; or Ps could have counters on desks. This is a good opportunity for less able Ps to consolidate, while more able Ps do creative exercise in <i>Ex. Bks</i> for other multiples of 3.)</p> <p>Who notices a connection between parts a) and b)? (Twice as many acorns so Mrs Squirrel went back twice as many times)</p> <p style="text-align: right;">28 min</p>	<p style="text-align: center;">Notes</p> <p>Individual work, monitored Do part a) with whole class first if necessary Use enlarged copy master or OHP or cut-out acorns stuck to BB. Discussion, reasoning, agreement, checking, praising BB: a) $4 \times 3 = 12$, $12 \div 3 = 4$ b) $8 \times 3 = 24$, $24 \div 3 = 8$ c) $6 \times 3 = 18$, $18 \div 3 = 6$</p>
6	<p>PbY2b, page 98</p> <p>Q.3 Read: <i>Colour one third of the number shown.</i> <i>Write a division about each picture and check your result with a multiplication.</i></p> <p>How can we work out how many to colour? (Count the number of items altogether and divide by 3) (Less able Ps could have counters, etc. on desks to put into 3 equal groups.)</p> <p>Review at BB with whole class. Ps come out to BB to explain reasoning and write equations. Class agrees/disagrees. Mistakes corrected. If problems, demonstrate with Ps at front of class. (This is another opportunity for less able Ps to consolidate, while more able Ps calculate one third of, e.g. 45, 57, 78*, 81)</p> <p style="text-align: right;">34 min</p>	<p>Individual work, monitored, helped Drawn on BB or use enlarged copy master or OHP Discussion, reasoning, agreement, checking, praising BB: a) $15 \div 3 = 5$, $3 \times 5 = 15$ b) $9 \div 3 = 3$, $3 \times 3 = 9$ c) $21 \div 3 = 7$, $3 \times 7 = 21$ *$78 = 30 + 30 + 18$, so one third of $78 = 10 + 10 + 6 = 26$</p>
7	<p>Factorising</p> <p>T writes the number '12' on the BB. Which numbers multiplied together make 12 (i.e. are <u>factors</u> of 12)? (e.g. 2×6) Are there any others? (e.g. 3×4) Any others? (1×12) T explains that <u>all</u> numbers have factors of 1 and the number itself. Let's concentrate on the <u>other</u> factors. T writes the other 2 suggestions in a diagram as opposite, gradually adding extra rows as required.</p> <p>Which numbers multiplied together make 2? (1×2) Any others? (No) Does 6 have any factors apart from 1 and 6? (2×3) T writes them in. Can we break the numbers down any further? (No, apart from 1 times the number itself.) Repeat for 3×4.</p> <p>Let's write the factors in both diagrams in increasing order. What do you notice? (Both diagrams end up with the same result, so it does not matter whether we wrote 2×6 or 3×4 at the start.)</p> <p>Repeat for another multiple of 2, 3, 5 or 10 suggested by Ps.</p> <p style="text-align: right;">40 min</p>	<p>Whole class activity Ps suggest the factorisation BB:</p>  <p>$2 \times 2 \times 3$ $3 \times 2 \times 2$ $12 = 2 \times 2 \times 3$</p> <p>Ps copy equations into <i>Ex. Bks.</i> too Discussion, agreement, checking, praising</p>
8	<p>Division with remainder</p> <p>T calls 7 Ps out to stand in a line facing the class. Ps hold hands in pairs. How many Ps? How many pairs? (3) How many remain? (1) We can write it as a division like this. (BB) Who agrees? Let's check. Repeat for $10 \div 3$, $17 \div 3$, $21 \div 5$, $24 \div 5$. Ps dictate the equations.</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity Demonstrate as long as needed BB: $7 \div 2 = 3$, remainder 1 <i>Check:</i> $3 \times 2 + 1 = 7$ etc.</p>

<h1>Y2</h1>	R: Operations already learned C: Multiplication and division by 3 E: <i>Logic and combinatoric problems. Division with remainders</i>	<h2>Lesson Plan</h2> <h1>99</h1>
Activity	Notes	Notes
<p>1</p> <p>Mental practice</p> <p>a) T says a number (e.g. 5), P₁ says the number 3 times T's number (15) If P₁ answers correctly, he/she says a number to P₂, ...</p> <p>b) T says a multiple of 3 (e.g. 6), P₁ says the number which is one third of T's number. (2) If P₁ answers correctly, he/she says a number to P₂, ... If a P says a number not exactly divisible by 3, class corrects it.</p> <p style="text-align: right;"><i>5 min</i></p>	<p>Whole class activity (T modifies Ps' numbers if they exceed the learned facts.)</p> <p>Reasoning (where needed), agreement, checking, correcting</p> <p>At a good pace. Praising</p>	<p>Whole class activity Use enlarged copy master/OHP</p> <p>Give Ps the chance to suggest methods of solution at each step</p> <p>If Ps reach correct solution by trial and error, praise them but also demonstrate logical solution</p> <p>Discussion, reasoning, agreement, praising</p> <p>Check <u>all</u> the equations</p> <p>BB: $55 + 15 + 30 = 100$ $\begin{array}{r} + \\ 31 - 11 + 30 = 50 \\ - \\ 33 - 13 - 5 = 15 \\ = \\ 53 - 13 - 5 = 35 \end{array}$</p>
<p>2</p> <p>PbY2b, page 99, Q.1</p> <p>Read: <i>The same shape stands for the same digit.</i> <i>Fill in the missing digits.</i></p> <p>1. Which number is different from the others? (the 3-digit number) What is the first 3-digit number (the only 3-digit number we have learned)? (100) Let's try that first. A, come and write '1' in all the triangles and '0' in all the stars.</p> <p>What should we do next? (If nobody knows T gives hints.)</p> <p>2. Look at the 1st row. The units digit in the answer is 0, the units digit in the 3rd number from left is 0, so the units digits in the first and 2nd numbers (i.e. rectangle + rectangle) must add up to give a units digit of 0. What digit could the rectangles be? (5, because $5 + 5 = 10$). B, come and write '5' in all the rectangles.</p> <p>3. Look at the 1st row again. What does the 3rd number from the left equal? ($100 - 55 - 15 = 30$) So what digit does the hexagon represent? (3) C, come and write '3' in all the hexagons.</p> <p>Let's check that we are correct! (horizontally and vertically.)</p> <p><i>Solution:</i> $\square = 5$, $\triangle = 1$, $\star = 0$, $\hexagon = 3$</p> <p style="text-align: right;"><i>12 min</i></p>	<p>3</p> <p>Making multiplications</p> <p>a) How many 2-factor multiplications could we make from the numbers 2, 3 or 5? Let's do it logically. Which numbers could be the first factor? (2, 3 or 5) T writes on BB:</p> <p style="text-align: center;">$2 \times \quad \quad 3 \times \quad \quad 5 \times$</p> <p>If we start with the first factor as 2 (T points), which numbers could be the 2nd factor? (2, 3 or 5). Ps come out to BB to write the three multiplications: $2 \times 2 = 4$, $2 \times 3 = 6$, $2 \times 5 = 10$</p> <p>Continue for $3 \times$ and $5 \times$ in a similar way. (Discuss that, e.g. $2 \times 3 = 3 \times 2 = 6$, so they are really the same multiplication.)</p> <p>BB: $2 \times 2 = 4$ $3 \times 3 = 9$ $5 \times 5 = 25$ $2 \times 3 = 6$ $3 \times 5 = 15$ $2 \times 5 = 10$ (6 <u>different</u> multiplications)</p> <p>b) How many <u>different</u> products could we make using 3 factors? As above. Discuss the case of equal multiplications in a different order, e.g. $2 \times 3 \times 5 = 5 \times 3 \times 2 = 30$, so the product is <u>not</u> different.</p> <p>* $3 \times 5 \times 5 = 3 \times 25 = 3 \times 20 + 3 \times 5 = 60 + 15 = 75$ * $5 \times 5 \times 5 = 5 \times 25 = 5 \times 20 + 5 \times 5 = 100 + 25 = 125$</p> <p style="text-align: right;"><i>18 min</i></p>	<p>Whole class activity.</p> <p>Ps suggest what to do (with T's help)</p> <p>Ps write multiplications in <i>Ex. Bks</i> too</p> <p>Discussion, reasoning, agreement, praising</p> <p>BB:</p> <p>b) $2 \times 2 \times 2 = 8$ $2 \times 2 \times 3 = 12$ $2 \times 2 \times 5 = 20$ $2 \times 3 \times 3 = 18$ $2 \times 3 \times 5 = 30$ $2 \times 5 \times 5 = 50$ $3 \times 3 \times 3 = 27$ $3 \times 3 \times 5 = 45$ * $3 \times 5 \times 5 = 75$ * $5 \times 5 \times 5 = 125$</p> <p>(10 different products)</p>

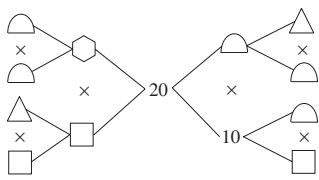

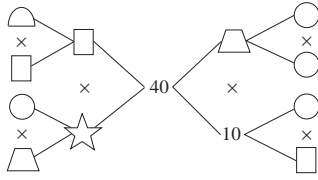

<h1>Y2</h1>		<p>Lesson Plan 99</p>																																																																																												
<p>Activity</p> <p>4</p>	<p>Interlude</p> <p>Song, rhyme, exercises</p> <p style="text-align: right;">20 min</p>	<p>Notes</p> <p>Whole class in unison</p>																																																																																												
<p>5</p>	<p>PbY2b, page 99, Q.2</p> <p>Read: Find these shapes and colour them in the number grid if the product of the numbers in each shape is:</p> <p>a) 12 b) 18.</p> <p>Deal with one part at a time. T explains task. Ps look at the diagrams in their Pbs, then put up their hand when they have found a shape.</p> <p>T chooses a P to colour the shape in the grid and write the numbers in the shape. Who agrees? Who thinks something else? D, come and check that the product is correct.</p> <p>(Or done as individual work, monitored, helped and reviewed at BB.)</p> <p>Possible solutions:</p> <p>a) <table border="1" style="display: inline-table; margin-right: 20px;"> <tr><td>3</td><td>5</td><td>2</td><td>7</td><td>2</td><td>6</td><td>3</td><td>6</td></tr> <tr><td>4</td><td>4</td><td>8</td><td>5</td><td>8</td><td>9</td><td>5</td><td>4</td></tr> <tr><td>7</td><td>9</td><td>6</td><td>2</td><td>7</td><td>6</td><td>5</td><td>3</td></tr> <tr><td>2</td><td>8</td><td>6</td><td>4</td><td>9</td><td>3</td><td>5</td><td>7</td></tr> <tr><td>2</td><td>3</td><td>5</td><td>3</td><td>8</td><td>2</td><td>2</td><td>8</td></tr> </table> <table border="1" style="display: inline-table; margin-right: 20px;"> <tr><td>2</td><td>6</td></tr> <tr><td>4</td></tr> <tr><td>3</td></tr> <tr><td>2</td></tr> <tr><td>3</td></tr> </table> <p>b) <table border="1" style="display: inline-table; margin-right: 20px;"> <tr><td>3</td><td>6</td><td>9</td><td>6</td><td>7</td><td>4</td><td>6</td><td>9</td></tr> <tr><td>7</td><td>9</td><td>5</td><td>2</td><td>9</td><td>3</td><td>5</td><td>9</td></tr> <tr><td>8</td><td>5</td><td>8</td><td>8</td><td>3</td><td>2</td><td>2</td><td>7</td></tr> <tr><td>2</td><td>6</td><td>4</td><td>2</td><td>7</td><td>9</td><td>7</td><td>5</td></tr> <tr><td>3</td><td>3</td><td>7</td><td>6</td><td>5</td><td>8</td><td>6</td><td>3</td></tr> </table> <table border="1" style="display: inline-table; margin-right: 20px;"> <tr><td>6</td><td>3</td></tr> <tr><td>2</td></tr> <tr><td>9</td></tr> <tr><td>2</td></tr> <tr><td>3</td></tr> </table> </p> <p style="text-align: right;">28 min</p> </p>	3	5	2	7	2	6	3	6	4	4	8	5	8	9	5	4	7	9	6	2	7	6	5	3	2	8	6	4	9	3	5	7	2	3	5	3	8	2	2	8	2	6	4	3	2	3	3	6	9	6	7	4	6	9	7	9	5	2	9	3	5	9	8	5	8	8	3	2	2	7	2	6	4	2	7	9	7	5	3	3	7	6	5	8	6	3	6	3	2	9	2	3	<p>Whole class activity</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Agreement, checking, praising</p> <p>Ps colour/write in Pbs too.</p> <p>BB: e.g.</p> <p>a) $2 \times 6 = 12$ $4 \times 3 = 12$ $2 \times 2 \times 3 = 12$</p> <p>b) $6 \times 3 = 18$ $2 \times 9 = 18$ $2 \times 3 \times 3 = 18$</p> <p>Other solutions possible</p>

<i>Activity</i>	Calculation practice, revision, activities, consolidation of 2, 3, 5 and 10 times tables <i>PbY2b, page 100</i>	<i>Notes</i>

<h1>Y2</h1>	<p>R: Mental operations C: Revision and practice E: <i>Day, hour, minute. Solids: cuboids</i></p>	<h2>Lesson Plan 102</h2>
<p>Activity</p> <p>1</p>	<p>Time</p> <p>a) T has a model clock on BB. T says a whole hour, e.g. '2 o'clock,' and P comes out to set the clock. (Revise where the big and little hands should point.) Class agrees/disagrees.</p> <p>b) T sets the hands to show a time (whole hours and half past the hour). Ps read the time. Class agrees/disagrees.</p> <p>c) T asks questions, e.g.</p> <ul style="list-style-type: none"> • What time do you wake up in the morning? • When does school start? • How many hours are you in school? • When do you have tea? • When do you go to bed? <p>Ps say approximate time and show on the clock. Talk about the difference between, e.g. 7 o'clock in the morning (7 am) and 7 o'clock in the evening (7 pm).</p> <p>Elicit that:</p> <p>1 hour = 60 minutes, half an hour = 30 minutes, 1 day = 24 hours</p> <p style="text-align: right;">_____ 10 min _____</p>	<p>Notes</p> <p>Whole class activity</p> <p>Agreement, checking, praising</p> <p>At speed round the class</p> <p>Involve several Ps</p> <p>Ps can ask questions too</p> <p>Discussion about there being 12 hours (am) + 12 hours (pm) = 24 hours in 1 day</p> <p>Talk about 24 hour clock</p> <p>T writes on BB and Ps in <i>Ex. Bks.</i></p>
<p>2</p>	<p>PbY2b, page 102</p> <p>Q.1 Read: <i>Colour in the number of glasses which can be filled from the large jug. How much will be left in the jug? Write equations about the pictures.</i></p> <p>Revise that 100 cl = 1 litre. Review at BB with whole class.</p> <p>a) $60 \text{ cl} - 15 \text{ cl} - 15 \text{ cl} - 15 \text{ cl} = \underline{0} \text{ cl}$ $60 \text{ cl} \div 4 = 15 \text{ cl}$ ($60 \text{ cl} \div 15 \text{ cl} = 4 \text{ times}$) 4 glasses filled and <u>no</u> water left in the jug. If we shared the water equally among the 5 glasses, how much would be in each glass? ($60 \text{ cl} \div 5 = \underline{12} \text{ cl}$)</p> <p>b) 1 litre = 100 cl $100 \text{ cl} - 25 \text{ cl} - 25 \text{ cl} - 25 \text{ cl} = \underline{0} \text{ cl}$ $100 \text{ cl} \div 4 = 25 \text{ cl}$ ($100 \text{ cl} \div 25 \text{ cl} = 4 \text{ times}$) 4 glasses filled and <u>no</u> water left in the jug. If we shared the water equally among the 5 glasses, how much would be in each glass? ($100 \text{ cl} \div 5 = \underline{20} \text{ cl}$)</p> <p style="text-align: right;">_____ 15 min _____</p>	<p>Individual work, monitored (helped)</p> <p>Drawn on BB or use enlarged copy master or OHP (or demonstrate with real jugs of water and plastic cups)</p> <p>Discussion, reasoning, checking, agreement, praising</p> <p>Ask Ps what other question could be asked about the pictures. e.g. How much water would be needed to fill <u>all</u> the glasses?</p>
<p>3</p>	<p>Operations</p> <p>T has 15 items stuck (or drawn) on BB. e.g.</p> <p>BB: * * * * * * * *</p> <p style="padding-left: 40px;">* * * * * * *</p> <p>Ps write additions, subtractions, multiplications, divisions about 15 in <i>Ex. Bks.</i> Encourage Ps to be creative! Review orally round class.</p> <p>Ps can draw own picture (or have items from their collection on desks for easier manipulation) and write operations about it.</p> <p style="text-align: right;">_____ 20 min _____</p>	<p>Individual work, monitored (low ability Ps helped)</p> <p>Discussion, agreement, checking, praising</p> <p>BB: e.g.</p> <p>$15 \div 2 = 7$, remainder 1 $15 = 2 \times 7 + 1$ $15 \div 3 = 5$, $3 \times 5 = 15$ $15 - 7 = 8$, $15 - 7 - 7 = 1$, etc.</p>
<p>4</p>	<p>Interlude</p> <p>Exercises or action song</p> <p style="text-align: right;">_____ 22 min _____</p>	<p>Whole class in unison</p>

Y2		Lesson Plan 102																		
Activity 5	<p>Logic Puzzle (OHT 15, Txt 2, page 35, Q.3, LHS)</p> <p>Look at these puzzles. What do you think the rule might be? (The number in the middle is the product of the 3 numbers around it. The same colour means the same number.)</p> <p>Let's look at the LH puzzle first. Where should we start? (e.g. with the '8' which is the product of 3 numbers which are all the same.)</p> <p>BB: $8 = \square \times \square \times \square$ (or with the 20: $20 = 5 \times \square \times \square$)</p> <p>A, come and write in the missing numbers. (2) Who agrees? Let's check. ($2 \times 2 \times 2 = 4 \times 2 = 8$) A, write 2 in all the <i>violet</i> squares.</p> <p>Where should we go next? (e.g. $16 = 2 \times 2 \times \square$)</p> <p>B, come and write in the missing number. (4) Who agrees? Let's check. ($2 \times 2 \times 4 = 4 \times 4 = 16$) B, write 4 in all the <i>pink</i> squares.</p> <p>Continue in this way until puzzle is completed</p> <p>Similarly for puzzle on RHS (e.g. start at 5 because the only factors of 5 are 1 and 5, so $5 = 1 \times 1 \times 5$)</p> <p style="text-align: right;">30 min</p>	<p style="text-align: center;">Notes</p> <p>Whole class activity</p> <p>If no OHP, use copy master, enlarged and coloured appropriately</p> <p>Ps suggest where to go next</p> <p>Checking, agreement, praising</p> <p><i>Solutions:</i></p> <table style="margin-left: auto; margin-right: auto;"> <tr> <td></td> <td style="text-align: center;">a)</td> <td style="text-align: center;">b)</td> </tr> <tr> <td>Violet</td> <td style="text-align: center;">→ 2</td> <td style="text-align: center;">4</td> </tr> <tr> <td>Pink</td> <td style="text-align: center;">→ 4</td> <td style="text-align: center;">2</td> </tr> <tr> <td>Yellow</td> <td style="text-align: center;">→ 3</td> <td style="text-align: center;">3</td> </tr> <tr> <td>Green</td> <td style="text-align: center;">→ 1</td> <td style="text-align: center;">5</td> </tr> <tr> <td>Orange</td> <td style="text-align: center;">→ 7</td> <td style="text-align: center;">1</td> </tr> </table> <p>(Let Ps have own copies of puzzle to colour appropriately and solve if they wish.)</p>		a)	b)	Violet	→ 2	4	Pink	→ 4	2	Yellow	→ 3	3	Green	→ 1	5	Orange	→ 7	1
	a)	b)																		
Violet	→ 2	4																		
Pink	→ 4	2																		
Yellow	→ 3	3																		
Green	→ 1	5																		
Orange	→ 7	1																		
6	<p>PbY2b, page 102</p> <p>Q.2 Read: <i>Write multiplications and divisions about the pictures.</i></p> <p>Ps can make each shape on desks with bricks or plastic cubes. How many cubes are in each layer? How many layers? How many cubes all together?</p> <p>Review at BB with whole class. T demonstrates if necessary with large model. Mistakes corrected. BB: e.g.</p> <p>a) $1 \times 3 \times 6 = 18$ $3 \times 6 = 18, 6 \times 3 = 18, 18 \div 3 = 6, 18 \div 6 = 3$</p> <p>b) $2 \times 2 \times 6 = 24$ $4 \times 6 = 24, 6 \times 4 = 24, 24 \div 6 = 4, 24 \div 4 = 6$</p> <p>c) $3 \times 3 \times 3 = 27$ $3 \times 9 = 27, 9 \times 3 = 27, 27 \div 3 = 9, 27 \div 9 = 3$</p> <p style="text-align: right;">35 min</p>	<p>Individual work, monitored, helped</p> <p>Discussion, agreement, checking, praising</p> <p>(or $2 \times 12 = 24$, etc.)</p>																		
7	<p>PbY2b, page 102</p> <p>Q.2 Read: <i>Fill in the missing numbers.</i></p> <p>Let's see how many you can do in 3 minutes! You may use your multiplication tables if you need to. The last one in each column is difficult and will need some thought!</p> <p>Review orally round class. Ps explain their reasoning for:</p> <p>$66 \div 2 = 33, 0 \div 5 = 0, 36 \div 3 = 12$. Mistakes corrected.</p> <p style="text-align: right;">40 min</p>	<p>Individual work, monitored</p> <p>Ps mark own (or neighbour's) work and count how many correct out of 18.</p> <p>Reasoning, agreement, checking, praising</p>																		
8	<p>PbY2b, page 102, Q.4</p> <p>Listen carefully and show me the answer with number cards when I say. (<i>Hint: Write it as an equation, then do the opposite operations.</i>)</p> <p><i>I thought of a number. I multiplied it by 3, then divided by 6 and got 2. What was the number I first thought of?</i></p> <p>Show me with number cards . . . now! (4)</p> <p>X, explain how you got your answer. Who agrees? Who did it another way? Let's check. BB: $\square \times 3 \div 6 = 2, 2 \times 6 \div 3 = 4$</p> <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>T (and Ps) repeat slowly</p> <p>T gives hint on how to solve it.</p> <p>In unison</p> <p>Reasoning, agreement, checking, praising</p>																		

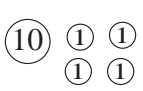

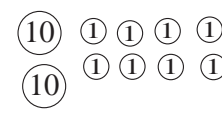

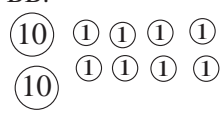

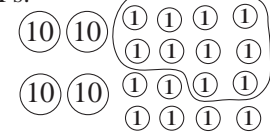

<h1>Y2</h1>	<p>R: Operations already learned C: Revision and practice E: <i>Days, hours, minutes</i></p>	<h2>Lesson Plan 103</h2>
<p>Activity</p> <p>1</p>	<p>Time</p> <p>T has large model (or real) clock with movable hands.</p> <p>a) How many hours are there in 1 day? (24) How many hours are in 2 days (3 days, half a day)? (48, 72, 12) T revises the two halves of a day (am/pm: before/after 12 noon) Which hand shows the hours on the clock? (small hand) A, come and move the clock on 1 hour. (Is A correct?)</p> <p>b) How many minutes are in one hour? (60) Which hand shows the minutes on the clock? (big hand) How many minutes does the big hand move if it goes from</p> <ul style="list-style-type: none"> – the '12' to the '1'? (5 minutes) So when the big hand is at the '1', we say the time is '5 minutes <u>past</u> the hour'. – from the '12' to the '2'? (10 minutes) So when the big hand is at the '2', we say the time is '10 minutes <u>past</u> the hour'. <p>What do you think the time will be if the big hand points to the '3'? (15 minutes past the hour, or a quarter past the hour because the big hand has gone a quarter of the way round the clock)</p> <p>How many minutes has the big hand gone in if it points to the '6'? (30 minutes) What do we say the time is? (30 minutes past or half past the hour because the big hand has gone half-way round the clock)</p> <p>What do you think the time will be if the big hand points to the '9'? (We could say the time is 45 minutes past the hour, or 3 quarters past the hour because the big hand has gone 3 quarters of the way round the clock). But we usually think of it in another way.</p> <p>How many minutes has the the big hand still to go before it reaches the '12'? (15 minutes) So we say that the time is 15 minutes <u>to</u> the hour, or a quarter <u>to</u> the hour because it still has a quarter of the way to go.</p> <p>All through the above, T mentions different ways of saying the time, e.g. '8.30 or 'half past eight'; 3.15 or a quarter past three; '2.45' or 'a quarter to three'.</p> <p>c) T sets the clock at certain times and Ps shout out time.</p> <p>d) T says a time and a P comes out to set the clock. Class agrees/disagrees. (Ps could have own model clocks on desks to set time and then show on command.)</p> <p style="text-align: right;"><i>12 min</i></p>	<p>Notes</p> <p>Whole class activity</p> <p>In unison, or individually at random with class agreeing/disagreeing</p> <p>BB: 1 day = 24 hours 2 days = $2 \times 24 = 48$ hours 3 days = $3 \times 24 = 72$ hours 24 hours $\div 2 = 12$ hours</p> <p>BB: 1 hour = 60 minutes (Ps could write in <i>Ex. Bks</i>)</p> <p>T starts off with the clock set at a time, e.g. 9 o'clock. Class chooses 'am' or 'pm'</p> <p>Demonstration, discussion, agreement.</p> <p>Ps repeat time in unison (If some Ps know all this already, let them explain)</p> <p>At each stage, T (or P) shows how time is written: BB: e.g. 9:00 am, 9.05 am, 9.10 am, 9.15 am, 9.30 am, 9.45 am</p> <p>Demonstration, discussion, agreement</p> <p>Ps repeat time after T</p> <p>In unison</p> <p>Copy master enlarged onto card, cut out and hands attached by paper fasteners</p>
<p>2</p>	<p>PbY2b, page 103</p> <p>Q.1 Read: <i>Compare the results. Write in the correct numbers and signs.</i> T explains task. (Add/subtract tens first, then the units.) Let's see how many you can do in 4 minutes! Start Stop! Review at BB with whole class. Mistakes corrected at class number line if necessary. Who did not finish them all? Who had them all correct? (1 mistake? What mistake?, etc.)</p> <p style="text-align: right;"><i>18 min</i></p>	<p>Individual work, monitored (Chance for slow Ps to catch up. Practice in calculating quickly for all Ps)</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Agreement, checking, self-correction, praising</p>
<p>3</p>	<p>Interlude</p> <p>Song/game about time (e.g. <i>What's the time, Mr. Wolf?</i>)</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Whole class in unison</p>

<p>Y2</p>	<p>R: Operations already learned C: Revision and practice E: Year, season, month, week, day, hour, minute</p>	<p><i>Lesson Plan</i> 104</p>
<p>Activity 1</p>	<p>Counting on the calendar a) How many months are there from 1 January this year to 1 December this year (next year)? (from 5 March this year to 5 September this year (next year)? (11, 23; 6, 18) b) How many days are there from 25 April to 31 May this year? (from 21 December this year to 3 January next year? (36, 13) c) Sequences of days in a month, e.g. The 1st January this year was a Saturday. Let's say the dates of all the Saturdays in January: '1, 8, 15, 22, 29' What day was the 1st February? (Tuesday)</p> <p style="text-align: right;"><i>8 min</i></p>	<p>Notes Whole class activity T has large calendar on BB and Ps have copies on desks Ps can suggest other dates to count the months and days Agreement, checking praising (Ps should try to answer without help of calendar)</p>
<p>2</p>	<p>Time a) T says a time, Ps show on clock (either on large model on BB or on own models). b) T show a time on clock, Ps read the time. c) How many hours are there from 7 am to 11 am (8 am to 3 pm, 11.30 pm to 4.30 am)? (4, 7, 5) etc. d) How many minutes are there from 2 o'clock to half past 2 (five past three to a quarter past three, 7.20 to 7.45, 11 am to 12.30 pm)? etc. (30, 10, 25, 90) etc. T gradually increases the difficulty of the questions, gauging them to the ability of the class.</p> <p style="text-align: right;"><i>14 min</i></p>	<p>Whole class activity Either one P after another to BB or <u>all</u> Ps show their clocks on command In relay round class, or shown with number cards T says the times in different ways Ps can ask questions too!</p>
<p>3</p>	<p>PbY2b, page 104 Q.1 Read: <i>Draw different rectangular gardens in the grid so that twice as many lettuces can grow in them as are in this garden.</i> What can you say about the lettuces in the picture? (3 rows of 4 lettuces or 4 columns of 3 lettuces, 12 lettuces altogether) How many lettuces must you draw? ($2 \times 12 = 24$) (Hint: Think of the different pairs of numbers which make 24.) Review a BB with whole class. T writes multiplications on BB.</p> <p style="text-align: right;"><i>20 min</i></p>	<p>Individual work, monitored, (helped) Grid drawn on BB or use enlarged copy master or OHP BB: $3 \times 4 = 4 \times 3 = 12$ Discussion, agreement, checking, praising BB: $24 = 1 \times 24 = 2 \times 12 = 3 \times 8 = 4 \times 6$</p>
<p>4</p>	<p>Interlude Action song</p> <p style="text-align: right;"><i>22 min</i></p>	<p>Whole class in unison</p>
<p>5</p>	<p>Logic puzzle Which numbers are represented by which shapes? BB: a)  b) </p> <p>Deal with one part at a time. Where should we start? Ps come out to fill in a number, explaining their reasoning. Class agrees/disagrees (In both cases, start at the factor already given.)</p> <p style="text-align: right;"><i>28 min</i></p>	<p>Whole class activity Drawn on BB or use enlarged copy master or OHP Discussion, agreement, checking, praising Solution: a) $\text{semi-circle} = 2, \text{hexagon} = 4,$ $\text{square} = 5, \text{triangle} = 1$ b) $\text{semi-circle} = 1, \text{square} = 5, \text{circle} = 2,$ $\text{triangle} = 4, \text{star} = 8$</p>

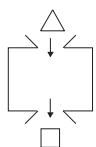

<p>Y2</p>		<p><i>Lesson Plan 104</i></p>
<p>Activity</p> <p>6</p>	<p><i>PbY2b, page 104</i></p> <p>Q.2 Read: <i>Write in the missing numbers and signs.</i></p> <p>Deal with one part at a time. Do part a) on BB with whole class first, then Ps do b) in <i>Pbs</i>. Review at BB with whole class.</p> <p>Then do part c) with whole class, then part d) done by Ps in <i>Pbs</i>. Review at BB with whole class. Mistakes corrected.</p> <p>(Ps may have multiplication table on desks if necessary.)</p> <p>BB: a) $6 \xrightarrow{\times 5} \boxed{30} \xrightarrow{\div 10} \boxed{3}$ $\xleftarrow{+5}$ $\xleftarrow{\times 10}$</p> <p>b) $35 \xrightarrow{\div 5} \boxed{7} \xrightarrow{\times 10} \boxed{70}$ $\xleftarrow{\times 5}$ $\xleftarrow{\div 10}$</p> <p>c) $3 \xrightarrow{\times 6} \boxed{18} \xrightarrow{\div 2} \boxed{9}$ $\xleftarrow{\times 3}$</p> <p>d) $\boxed{3} \xrightarrow{\times 2} 6 \xrightarrow{\times 5} \boxed{30}$ $\xleftarrow{\times 10}$</p> <p style="text-align: center;">35 min</p>	<p>Notes</p> <p>Whole class, then individual work</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, checking, praising</p> <p>a) and b) Inverse operations</p> <p>c) and d) Two operations replaced by one</p>
<p>Extension</p> <p>7</p>	<p><i>PbY2b, page 104</i></p> <p>Q.3 Read: <i>Compare the results. Write in the missing numbers and signs.</i></p> <p>Let's see how many you can do in 4 minutes!</p> <p>Review at BB with whole class. Ps read out the inequalities from left to right and right to left. Mistakes corrected at class number line.</p> <p>BB: $\frac{4 \times 5}{\boxed{20}} < \frac{4 \times 10}{\boxed{40}}$ $\frac{30 + 10}{\boxed{3}} = \frac{15 + 5}{\boxed{3}}$ $\frac{2 \times 3}{\boxed{6}} < \frac{3 \times 3}{\boxed{9}}$</p> <p>$\frac{6 \times 5}{\boxed{30}} = \frac{3 \times 10}{\boxed{30}}$ $\frac{50 + 5}{\boxed{10}} > \frac{50 + 10}{\boxed{5}}$ $\frac{24 + 3}{\boxed{8}} < \frac{27 + 3}{\boxed{9}}$</p> <p>Could we have worked out what the sign could be <u>without</u> doing the calculations? (Yes, e.g. 4 times an amount <u>must</u> be smaller than 4 times <u>double</u> the amount, etc.)</p> <p>Talk about 1 tenth, 1 fifth, 1 third, 1 quarter.</p> <p style="text-align: center;">40 min</p>	<p>Individual work, monitored, (helped)</p> <p>Written on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, checking, self -correcting</p> <p>Praising</p> <p>Discussion, agreement</p> <p>Ps look for examples of each in the question</p>
<p>8</p>	<p><i>PbY2b, page 104</i></p> <p>Q.4 Read: <i>Find a rule. Complete the table.</i> <i>Write the rule in different ways.</i></p> <p>Look at the 2 columns already done. What could the rule be? (Ps agree on one form of the rule, even if expressed in words, e.g. 'the triangle times the square equals the circle', or 'the middle row times the top row equals the bottom row'.)</p> <p>Let's use this rule to complete the table. Review at BB with whole class. Mistakes corrected.</p> <p>(Some numbers are beyond the multiplication table but can be worked out logically,</p> <p>e.g. $2 \times 12 = 2 \times 10 + 2 \times 2 = 20 + 4 = 24$ $3 \times 11 = 3 \times 10 + 3 \times 1 = 30 + 3 = 33$)</p> <p>How could we write the rule? T writes with help from Ps, saying the equation in words too. Could we write it another way?</p> <p>Ps suggest different ways. T or (P) writes on BB, Ps in <i>Pbs</i>.</p> <p style="text-align: center;">45 min</p>	<p>Whole class introduction</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Ask several Ps what they think</p> <p>Individual work, monitored, helped</p> <p>Discussion, reasoning, agreement, checking, praising</p> <p><i>Rule:</i> $\bullet = \blacktriangle \times \blacksquare$ $\blacksquare = \bullet \div \blacktriangle$ $\blacktriangle = \bullet \div \blacksquare$</p>

Y2		<i>Lesson Plan 105</i>
<i>Activity</i>	Tables practice, revision, activities, consolidation <i>PbY2b, page 105</i>	<i>Notes</i>

Y2	R: Mental calculation C: Multiplication and division table for 4 E: <i>Relationship between the 2 and 4 times multiplication tables</i>	<i>Lesson Plan</i> 106
Activity		Notes
1	Multiples of 4 T points to Ps to count from 1 onwards but on every 4th number the P shouts 'Boom' instead of the multiple of 4. (1, 2, 3, Boom!, 5, 6, 7, Boom!, 9, 10, 11, Boom!, . . .) Any P who makes a mistake must stand up! T chooses them again later on and they may sit down again if they are correct the 2nd time. <div style="text-align: right;">3 min</div>	Whole class activity Ps chosen at random by T At speed, in good humour! Good-natured teasing of Ps who make a mistake. Praising
2	Problem T could have real piece of clover to show class. Talk about how a piece of clover which has 4 leaves (as opposed to the normal 3 leaves) is thought to be very lucky because it is so rare! T: <i>Kate found 3 pieces of 4-leaf clover. How many leaves did the 3 pieces of clover have altogether?</i> Let's make them on the BB (on your desks). Ps come out to stick on leaves (or draw). Who can write it in a mathematical way? Who agrees? Who can think of another way? etc. Ps also write equations in <i>Ex. Bks.</i> (<i>Heading: Lesson 106 and date</i>) <div style="text-align: right;">8 min</div>	Whole class activity Ps can illustrate on desks with counters and sticks or draw in <i>Ex. Bks.</i> BB:  $4 + 4 + 4 = 12$ $3 \times 4 = 12, 4 \times 3 = 12$ Agreement, checking, praising
3	Number strips (or Cuisenaire rods or multilink cubes) Ps have 9 number strips 2 cm and 4 cm long (or 9 lengths of 2×1 cm cubes and 4×1 cm cubes stuck together, or 9 '2' and '4' rods from Cuisenaire set) on desks.  What is the total length of 3 '2 cm' strips? (3 '4 cm' strips, 6 '2 cm' strips, 6 '4 cm' strips)? Ps show each on desks and write equations about it in their <i>Ex. Bks.</i> Review at BB with whole class. Who notices a connection between the lengths? ($3 \times 4 \text{ cm} = 6 \times 2 \text{ cm}$) <div style="text-align: right;">13 min</div>	Individual or paired work Monitored, helped (Or T demonstrates on BB as whole class activity) BB: $3 \times 2 \text{ cm} = 6 \text{ cm}$ $3 \times 4 \text{ cm} = 12 \text{ cm}$ $6 \times 2 \text{ cm} = 12 \text{ cm}$ $6 \times 4 \text{ cm} = 24 \text{ cm}$
4	PbY2b, page 106 Q.1 Read: <i>Sparrow starts at 0 and jumps 4 units at a time. Frog also starts at 0 but jumps 2 units at a time. Draw their jumps on the number lines.</i> Ps draw jumps in <i>Pbs.</i> How many jumps of 4 units did you draw for Sparrow (Frog)? (10, 20) Read: <i>Fill in the table to show how far they have gone after these jumps.</i> Ps come to BB one after another to fill in a column each and say the relevant multiplications, (e.g. ' $3 \times 2 = 6$ ', and ' $3 \times 4 = 12$ '). Read: <i>Who made longer jumps (more jumps)? (Sparrow, Frog) How much longer? How many more? Elicit that:</i> <ul style="list-style-type: none"> • Sparrow jumps twice as far each time so needs half as many jumps to cover the same distance as Frog, or • Frog jumps half as far so needs twice as many jumps to cover the same distance as Sparrow. <div style="text-align: right;">20 min</div>	Individual work in drawing jumps, monitored Use enlarged copy master or OHP Whole class activity in filling in the table. Ps fill in table in <i>Pbs</i> too BB: $4 = 2 \times 2$ (twice 2) $2 = 4 \div 2$ (half of 4) Discussion, agreement, checking praising
5	Interlude Action song or rhyme <div style="text-align: right;">22 min</div>	Whole class in unison

<h1>Y2</h1>	<p>R: Mental calculation. Half, twice C: Multiplication and division table for 4 E: <i>Relationship with 2</i></p>	<h2>Lesson Plan 107</h2>
<p>Activity</p> <p>1</p>	<p>Sharing</p> <p>T has 12 apples in a basket (real apples or 12 balls), or drawn, cut out and stuck to BB (e.g. Y2 copy master LP 29/5). T calls two Ps to front.</p> <p>Let's share these apples equally between A and B. C, come and show us how to do it. Is C correct? Who thinks something else? Who can write an equation about it? Who agrees? Ps can also write in <i>Ex. Bks.</i> (<i>Heading: Lesson 107 and today's date</i>)</p> <p>What part of the 12 apples does A (B) have? (half)</p> <p>Repeat with 3 and 4 Ps at front. (3 equal parts, each has 1 third; 4 equal parts, each has 1 quarter) Who has more? (All have the same.)</p> <p>When did a P have most (least) apples? (When each had 1 half, 1 quarter)</p> <p style="text-align: right;">8 min</p>	<p>Notes</p> <p>Whole class activity</p> <p>Demonstration: 1 apple given to each P in turn, or moved to each side of BB.</p> <p>Discussion, agreement, checking, praising</p> <p>BB: $6 + 6 = 12$ $2 \times 6 = 12$ $12 \div 2 = 6$</p> <p>$4 + 4 + 4 = 12$ $3 + 3 + 3 + 3 = 12$ $3 \times 4 = 12$ $4 \times 3 = 12$ $12 \div 3 = 4$ $12 \div 4 = 3$</p>
<p>2</p> <p>Coins</p> <p>T has large cut-out coins stuck to BB and Ps have smaller coins on desks, e.g. Y2 copy master LP 27/4 (or beads threaded in tens + single beads, or lolly sticks bound in groups of 10 + single lolly sticks, etc.)</p> <ul style="list-style-type: none"> Lay out on your desks <u>twice</u> the amount I show on the BB. Who can come and write an equation about it? e.g. <p>BB:  → Ps:  $2 \times 10 = 20$ $2 \times 4 = 8$ $2 \times 14 = 28$</p> <ul style="list-style-type: none"> Who can show what twice 28 is? Who can write equations about it? <p>BB:  → Ps:  $2 \times 20 = 40$ $2 \times 8 = 16$ $2 \times 28 = 56$</p> <p>10 ones exchanged for one 10</p> <p>Extension</p> <ul style="list-style-type: none"> Repeat for 23 and 16. <p>Elicit that multiplying by 4 is the same as multiplying by 2 twice.</p> <p style="text-align: right;">15 min</p>	<p>Whole class activity</p> <p>Ps may work in pairs to lay out coins, etc. on desks.</p> <p>Discussion, agreement, checking, praising</p> <p>Ps write equations in <i>Ex. Bks</i> too</p> <p>BB: $2 \times 14 = 28$ $2 \times 28 = 56$ } $4 \times 14 = 56$</p> <p>T shows on BB, Ps exchange coins on desks</p> <p>$2 \times 23 = 46$ $2 \times 46 = 92$ } $4 \times 23 = 92$</p>	<p>Individual work, monitored (helped)</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, checking, praising</p> <p>In chorus</p>
<p>3</p> <p>PbY2b, page 107</p> <p>Q.1 Read: <i>How many legs do several hens and cats have?</i> <i>Complete the table.</i></p> <p>Ask Ps what each row of table means (middle row is 2 times top row; bottom row is 4 times top row or 2 times middle row).</p> <p>Review at BB with whole class. Mistakes corrected.</p> <p>Let's read out the multiples of 2 (4) together.</p> <p style="text-align: right;">20min</p>	<p>4</p> <p>Interlude</p> <p>Action song</p> <p style="text-align: right;">22 min</p>	<p>Whole class in unison</p>

Y2		<i>Lesson Plan 107</i>
Activity 5	Dividing by 4 T sticks 20 (28) of the same element on the BB. (e.g. apples, hats, hexagons, triangles, flowers, chicks, etc.) Let's divide them up into groups of 4. Ps come out to BB to rearrange or circle in 4s. How many groups are there? (5, 7) D , come and write an equation about it and explain to us what you are doing. Who agrees? Who thinks something else? BB: e.g. 20 chicks \div 4 chicks = 5 (times), because $5 \times 4 = 20$ 28 triangles \div 4 triangles = 7 (times), because $7 \times 4 = 28$ Check with additions/subtractions if necessary. Let's find them in the multiplication table. P comes out to BB to point to 20 and 28 on <i>OHT 14</i> or copy master, Ps find in own \times tables. <p style="text-align: right;">28 min</p>	Notes Whole class activity Enlarged from Y1 copy masters, coloured and cut out Class agrees/disagrees In unison Reasoning, agreement, checking, praising Encourage Ps to say the whole equation as they write. BB: e.g. $4 + 4 + 4 + 4 + 4 = 20$ $20 - 4 - 4 - 4 - 4 - 4 = 0$
6	PbY2b, page107 Q.2 Read: <i>How many fruit jellies are in each box?</i> <i>Write a multiplication about it.</i> Tell Ps to circle the sweets in groups to match their multiplication. Review at BB with whole class. Mistakes corrected. Compare the various boxes. First give Ps chance to notice for themselves the relationships between the boxes. If nobody does, T gives hints. Which box has twice (half, 4 times, 1 quarter) as many sweets as the box in, e.g. part f)? etc. <p style="text-align: right;">35 min</p>	Individual work, monitored, helped Use enlarged copy master/OHP BB: (in 4's or 2's) e.g. a) $4 \times 2 = 8$ or $2 \times 4 = 8$ b) $4 \times 4 = 16$ or $2 \times 8 = 16$ Discussion, agreement, checking, praising
7	PbY2b, page107 Q.3 Read: <i>Divide up these 36 coins into 4 equal groups.</i> How could we do it? (e.g. by writing 1, 2, 3, 4 above the coins and joining a coin to each number in turn, or by choosing 4 colours and colouring in the coins one after the other in each of the different colours, or by putting 36 items from Ps' collections on desk and moving one after the other to the 4 corners of desk in turn. or by calculation: $36 \div 4$). Ps use any of these to solve it. Read: <i>How many coins are in each part?</i> (9) Write a division about it and check it with a multiplication. Review at BB with whole class. Mistakes corrected. Demonstrate with 36 cubes and 4 Ps at front of class if necessary. <p style="text-align: right;">40 min</p>	Individual work, monitored, (helped) 36 coins stuck to BB or use enlarged copy master or OHP Discussion, agreement. Ask several Ps what they think In unison, or with number cards BB: $36 \div 4 = 9$ <i>Check:</i> $9 \times 4 = 36$ Discussion, agreement, checking, praising
8	PbY2b, page107, Q.4 T chooses 3 Ps to stand in front of BB. T writes their names on BB and beneath each name (above each child) sticks 24 cut-out sweets. T explains task and asks class to say who they think will finish their sweets first. Class keeps count of days and at each day the 3 Ps remove their allotted number of sweets (2, 3 or 4). Who finished first? (P who ate 4 per day) Who can come and write divisions about it. Who agrees? Who thinks something else? Let's check. Ps to BB to write multiplications. Ps write equations in <i>Pbs</i> too. (Or done as individual work, with Ps crossing out 2 (3, 4) sweets at a time and keeping a tally of days at side of <i>Pbs</i> or circling in groups of 2, 3, 4 and counting the groups). Compare the number of sweets/days. <p style="text-align: right;">45 min</p>	Whole class activity Real demonstration or use enlarged copy master or OHP BB: Charlie: $24 \div 2 = 12$ <i>Check:</i> $12 \times 2 = 24$ Leslie: $24 \div 3 = 8$ <i>Check:</i> $8 \times 3 = 24$ Mary: $24 \div 4 = 6$ <i>Check:</i> $6 \times 4 = 24$ Mary ate twice as many per day, so her sweets lasted half as long as Charlie's

<p>Y2</p>	<p>R: Mental calculation C: Multiplication and division table for 4 E: Factorisation</p>	<p><i>Lesson Plan</i> 108</p>														
<p>Activity 1</p>	<p>Sequences T starts off a sequence, then points to Ps to continue it. e.g. T: 0, 4, 8, 12, . . . ; 28, 24, 20, . . . ; 1, 5, 9, 13, . . . 5 min</p>	<p>Notes Whole class activity At speed. T chooses Ps at random. Class points out errors</p>														
<p>2</p>	<p>Functions T has diagram and table on BB. What could the machine be doing? BB:</p> <div style="display: flex; align-items: center; justify-content: center;">  <table border="1" style="margin: 0 20px;"> <tr><td>△</td><td>2</td><td>3</td><td>5</td><td></td><td>10</td><td>7</td></tr> <tr><td>□</td><td>8</td><td>12</td><td></td><td>16</td><td>24</td><td>36</td></tr> </table> <div style="margin-left: 20px;"> <p>□ = △ =</p> </div> </div> <p>Ps come out to BB one after the other to fill in a missing number and explain their reasoning. Class agrees/disagrees. Who can come and write the rule? Who agrees? Who can write it another way? Let's check with values from the table. Let's say the rule together. 10 min</p>	△	2	3	5		10	7	□	8	12		16	24	36	<p>Whole class activity Drawn on BB or use enlarged copy master or OHP Ps may use their multiplication tables. Discussion, agreement, checking, praising Rule: □ = 4 × △ △ = □ ÷ 4 In unison</p>
△	2	3	5		10	7										
□	8	12		16	24	36										
<p>3</p>	<p>PbY2b, page107 Q.1 Read: Write in the missing numbers. Learn and practise the 4 times table. Deal with one column at a time. Review orally round class. Elicit that the answers to the multiplications (products) are the same as the first numbers in the divisions. In the next 2 minutes try to learn the multiplications by heart and then we will try to say them without looking at the books! Close your Pbs and let's say the 4 times table together. 'zero times four equals zero, one times four equals four, . . .' Let's say it another way in a relay, starting with '4 times zero' Now let's say the divisions for 4: 'zero divided by four equals zero, . . .' (Demonstrate this first division if necessary.) 22 min</p>	<p>Individual work, monitored (helped) Class points out mistakes Ps correct their errors T asks for quiet so that everyone can concentrate In unison, at speed One P after another, at speed In unison, at a good pace, with T's help. Praising</p>														
<p>4</p>	<p>Interlude Song, rhyme, exercises 24 min</p>	<p>Whole class in unison</p>														
<p>5 Extension</p>	<p>Fractions of 24 T sticks (or has drawn) 10 4 × 6 squared grids on BB, each with 1 half, 1 quarter, 1 third (or 1 sixth) shaded or coloured in.</p> <ul style="list-style-type: none"> Who can tell me something about these grids? (6 rows, 4 squares in each row, 24 squares in total; parts of the grids are shaded (coloured)). Who can come and point to the grid which has half (1 quarter, 1 third, 1 sixth) of the total number of squares shaded (coloured)? Who agrees? Who thinks another one? Let's check by counting the squares. Who can come and write a division about it? Who agrees? How can we check it is correct? (with a multiplication). (BB) e.g. 24 ÷ 2 = 12, 12 × 2 = 24; 24 ÷ 4 = 6, 6 × 4 = 24; etc Ps have blank grids on desks and colour in squares to show 1 eighth. <p>30 min</p>	<p>Whole class activity Drawn on BB or use enlarged copy masters or OHP (or blank grids coloured in) BB: 4 × 6 = 6 × 4 = 24 Discussion, agreement, checking, praising BB:</p> <div style="display: flex; flex-wrap: wrap; justify-content: space-around;"> <div style="text-align: center;"> 1 half</div> <div style="text-align: center;"> 1 sixth</div> <div style="text-align: center;"> 1 quarter</div> <div style="text-align: center;"> 1 third</div> <div style="text-align: center;"> 1 quarter</div> </div> <div style="display: flex; flex-wrap: wrap; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> 1 quarter</div> <div style="text-align: center;"> 1 third</div> <div style="text-align: center;"> 1 half</div> <div style="text-align: center;"> 1 quarter</div> <div style="text-align: center;"> 1 half</div> </div>														

Y2		<i>Lesson Plan 108</i>
Activity 6	<p>PbY2b, page 108</p> <p>Q.2 Read: <i>Fill in the missing numbers.</i></p> <p>T explains task. Deal with one part at a time. Review at BB with whole class. Mistakes corrected using multiplication square if necessary.</p> <p>In b), remind Ps that: $12 \times 4 = 10 \times 4 + 2 \times 4 = 40 + 8 = 48$</p> <p style="text-align: right;">35 min</p>	<p style="text-align: center;">Notes</p> <p>Individual work, monitored, (helped)</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Discussion, agreement, checking, praising</p>
7	<p>PbY2b, page 108, Q.3</p> <p>Read: <i>Tom made a square from 4 sticks. How many squares could he make from more sticks? Complete the table.</i></p> <p>T demonstrates how Tom made 1 square on BB (with 4 sticks/straws).</p> <p>A, come and point to the column in the table which shows this. (1st column) Tell us what each row stands for. Is A correct? Can you say it as an equation? ($4 \div 4 = 1$, and no sticks remaining)</p> <p>Ps come out one at a time to choose a column and fill in the missing numbers, saying the matching equation. Class agrees/disagrees. (e.g. $23 \div 4 = 5$, and 3 sticks remaining, or $4 \times 5 + 2 = 22$)</p> <p>T should have enough sticks/straws to be able to demonstrate if there are problems.</p> <p style="text-align: right;">40 min</p>	<p>Whole class activity</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Done at a good pace</p> <p>T repeats incorrect equations correctly and writes on BB</p> <p>Discussion, reasoning, agreement, checking</p> <p>Praising</p> <p>(Ps could have sticks, etc. on desks too)</p>
8	<p>PbY2b, page 108</p> <p>Q.4 Read: <i>Fill in the missing signs.</i></p> <p>Deal with one part at a time. T tells Ps that they can write down the results of the LHS and RHS before writing in the missing sign, but that they might not always need to do this.</p> <p>Review orally round the class, with Ps explaining reasoning</p> <p>Demonstrate on class number line/ multiplication square if problems.</p> <p><i>Solution:</i></p> <p>a) $5 \times 2 > 20 \div 4$, $25 \div 5 < 24 \div 4$, $10 \times 9 < 100 - 9$</p> <p>b) $9 \times 3 < 10 \times 3$, $3 \times 8 > 4 \times 5$, $36 \div 4 < 20 \div 2$</p> <p>c) $15 \div 5 < 15 - 5$, $10 \times 2 > 2 \times 8$, $5 \times 5 > 24 - 4$</p> <p>d) $8 \times 2 = 8 + 8$, $12 \div 4 = 3 - 0$, $40 \div 4 < 7 + 4$</p> <p style="text-align: right;">45 min</p>	<p>Individual work, monitored, helped</p> <p>Ps may use their \times tables and number lines to help them.</p> <p>Class agrees/disagrees</p> <p>Point out that, e.g.</p> <p>10×2 <u>must</u> be more than 8×2, so sign can be written without needing to work out the LHS and RHS</p> <p>Praising</p>

Y2	R: Mental calculation C: Multiplication and division table for 4 E: <i>Division with remainders</i>	<i>Lesson Plan</i> 109
Activity	Notes	
1	Competition on the 4 times table Open your books at your multiplication table. Check that you <u>do</u> know the multiplications for the numbers you have already coloured. Now colour in any new numbers if you are <u>sure</u> you know a multiplication and division about them. Who has coloured all the multiples of 4? Let's have a competition! T chooses 3 or 4 Ps who stand with heels against the back wall of the classroom. T (or Ps) ask them multiplications/divisions about the 2, 3, 4, 5 and 10 times tables. If a P answers correctly they take one step forward, if incorrect, they stand still. Rest of class checks their answers and cheers them on. The winner is the one who reaches the 'finishing line' first (previously agreed on by class). <i>10 min</i>	Whole class activity T can do a random check for a couple of minutes Ps stand up if they think they know them all Done at a good pace Competitors shout out the products or quotients Class give '3 cheers' to the winner!
2	Mental practice (chain operations) T says a sequence of calculations, pausing after each step. Ps nod their heads when they have done the calculation. e.g. T: '3 ... \times 3 ... + 2 ... - 1 ... \div 2 ... \times 4' Show me the answer with number cards ... now! (20) A , tell us how you got your answer. Who agrees? Where did you make your mistakes? Who can tell me different ways to describe the number 20? (e.g. 'the number 1 more than 19 and 1 less than 21', ' 2×10 ', ' 5×4 ', ' $16 + 4$ ', $50 - 30$, the first 2-digit number which has an even tens digit, etc.) <i>15 min</i>	Whole class activity T waits until most Ps have nodded their heads before moving on In unison Agreement, checking, praising Involve several Ps Class agrees/disagrees and corrects inaccurate statements Praising
3	Problem Listen carefully and show me the answer as a multiplication (equation) on your desks using number and sign cards. a) <i>There are 4 girls in the room. Each girl is holding 3 books. How many books are they holding altogether?</i> B , tell us your equation. Who has the same? Who has a different one? b) <i>There are 3 boys in the room. Each boy is holding 4 books. How many books are they holding altogether?</i> C , tell us your equation. Who has the same? Who has a different one? Elicit that $4 \times 3 = 3 \times 4 = 12$ <i>20 min</i>	Individual (or paired) work T repeats slowly Reasoning, agreement, checking, praising BB: a) $4 \times 3 = 12$ b) $3 \times 4 = 12$ Demonstrate with Ps at front of class if necessary
4	Interlude Song, rhyme, exercises <i>22 min</i>	Whole class in unison

Y2		<i>Lesson Plan 109</i>
Activity 5	<p>PbY2b, page 109</p> <p>Q.1 Read: <i>Buster is jumping 4 units at a time back along the number line. . . .</i></p> <p>Deal with one colour at a time. Ps read numbers out in relay round class (or in unison). What do you notice about them?</p> <p><i>Red:</i> 4, 8, 12, . . . , 40; <i>Blue:</i> 5, 9, 13, . . . , 37; <i>Green:</i> 6, 10, 14, . . . , 38; <i>Black:</i> 7, 11, 15, . . . , 39;</p> <p>Elicit that <i>red</i> numbers are multiples of 4 and divide by 4 exactly; <i>blue</i> (<i>green, black</i>) numbers have remainder 1 (2, 3) when divided by 4; no other remainder is possible.</p> <p>Read: <i>Complete the table.</i></p> <p>T first makes sure that Ps know what each row means by using the 1st column already filled in. Who can say an equation about the first column? Who agrees? Who knows another one? (BB)</p> <p>Ps come out to table to choose a column, write in the missing numbers and say the matching equation. Class agrees/disagrees.</p> <p style="text-align: right;">28 min</p>	<p style="text-align: center;">Notes</p> <p>Individual work in drawing dots, monitored, helped</p> <p>Ask several Ps what they think</p> <p>Discussion, agreement, checking, praising</p> <p>Demonstrate if necessary with Ps showing jumps on class number line.</p> <p>Whole class activity, but Ps write in <i>Pbs</i> too</p> <p>BB: $11 \div 4 = 2$, remainder 3 $2 \times 4 + 3 = 11$</p> <p>Reasoning, agreement, praising</p>
Extension 6	<p>PbY2b, page 109</p> <p>Q.2 Read: <i>A rabbit has 4 legs. How many legs could you see if there were several rabbits? Complete the table.</i></p> <p>T should ask the question in two ways: for numbers missing from bottom row – as above; for numbers missing from top row – 'How many rabbits were there if you could see this number of legs?'</p> <p>Review at BB with whole class. Mistakes corrected. Who could write an equation for each row in the table? Who agrees?</p> <p>If I wanted the number '10' in the table, which row would it have to go in? (top row, as not divisible exactly by 4 so can't be the number of legs.)</p> <p style="text-align: right;">34 min</p>	<p>Individual work, monitored</p> <p>Drawn on BB or use enlarged copy master or OHP</p> <p>Agreement, checking, self-correcting, praising</p> <p>BB: Let number of: Rabbits = <i>R</i>, Legs = <i>L</i> $R = L \div 4$ $L = R \times 4$</p> <p>Praising</p>
7	<p>PbY2b, page 109</p> <p>Q.2 Read: <i>Measure the lengths of the line segments. . . .</i></p> <p>Deal with one part at a time. T revises how to measure accurately.</p> <ul style="list-style-type: none"> • Ps measure the length of each line carefully and write the value in the first box. • Then they calculate each segment length and write it in the 2nd box. • Then they mark each segment on the line with a short, vertical line. • Then they draw over the correct segment in the correct colour. <p>Review at BB with whole class. Elicit that 1 half of something is obtained by dividing by 2, 1 third by dividing by 3 and 1 quarter by dividing by 4.</p> <p style="text-align: right;">42 min</p>	<p>Ps have rulers on desks</p> <p>Individual work, but under T's instructions</p> <p>Discussion at BB, using enlarged copy master or OHP for demonstration only!</p> <p>BB:</p> <p>a) Half of <u>10</u> cm is <u>5</u> cm $10 \text{ cm} \div 2 = 5 \text{ cm}$</p> <p>b) 1 third of <u>6</u> cm is <u>2</u> cm $6 \text{ cm} \div 3 = 2 \text{ cm}$</p> <p>c) 1 quarter of <u>12</u> cm is <u>3</u> cm $12 \text{ cm} \div 4 = 3 \text{ cm}$</p>
8	<p>Multiplication and division practice</p> <ul style="list-style-type: none"> • T says a multiplication/division (2, 3, 4, 5, 10) and P says answer. • T says a multiple of 2, 3, 4, 5 or 10 and P says a multiplication or division about it. (Some Ps may need to use their \times tables.) <p style="text-align: right;">45 min</p>	<p>Whole class activity</p> <p>At speed round class</p> <p>Class points out errors</p> <p>Praising</p>
